Tech Company Group Acronyms

No.	Company	No.	Company	No.	Company
01	FAANG (Original Classic)	07	FANG (Early Version)	13	IND-SAAS / India SaaS Leaders (Unofficial)
02	MAANG (Updated FAANG)	08	FAANG+ (or FAANG Plus)	14	AI Big Tech Cluster
03	MANGA	09	MATANA	15	MAGMA (AI/Cloud Context)
04	FAAMG	10	BAT (China Tech Giants)	16	FAAMNG
05	MAMAA	11	BATX	17	GRANOLAS (Europe – Goldman Sachs term)
06	GAFAM (Popular in Europe)	12	TMD (India)	18	

Here's a **comprehensive list of commonly used "tech company group" acronyms** similar to **MAANG / FAANG**, along with what they stand for and when they're used

 Popular Big Tech Acronyms

1. FAANG (Original Classic)

- **F** – Facebook (now Meta)
- **A** – Amazon
- **A** – Apple
- **N** – Netflix
- **G** – Google

 Used to describe top US tech growth companies (especially in stock market context).

---

2. MAANG (Updated FAANG)

- **M** – Meta
- **A** – Amazon
- **A** – Apple
- **N** – Netflix
- **G** – Google

 Updated after Facebook rebranded to Meta.

---

3. MANGA

- **M** – Meta
- **A** – Amazon
- **N** – Netflix
- **G** – Google
- **A** – Apple

 Same companies, different ordering.

---

4. FAAMG

- **F** – Facebook (Meta)
- **A** – Apple
- **A** – Amazon
- **M** – Microsoft
- **G** – Google

 Includes **Microsoft**, removes Netflix.

---

5. MAMAA

- **M** – Microsoft
- **A** – Apple
- **M** – Meta
- **A** – Amazon
- **A** – Alphabet (Google)

 More modern, includes strongest tech giants.

---

6. GAFAM (Popular in Europe)

- **G** – Google
- **A** – Apple
- **F** – Facebook (Meta)
- **A** – Amazon
- **M** – Microsoft

 Commonly used in EU regulatory discussions.

---

7. FANG (Early Version)

- **F** – Facebook
- **A** – Amazon
- **N** – Netflix
- **G** – Google

 Before Apple was included.

 Extended / Modern Big Tech Groups

8. FAANG+ (or FAANG Plus)

Includes:

- FAANG companies
  -
  - Microsoft
  -
  - Tesla
  -
  - NVIDIA

 Used in investing & AI discussions.

---

9. MATANA

- **M** – Microsoft
- **A** – Apple
- **T** – Tesla
- **A** – Alphabet
- **N** – NVIDIA
- **A** – Amazon

 Popular in AI + market cap discussions (very modern).

---

10. BAT (China Tech Giants)

- **B** – Baidu
- **A** – Alibaba
- **T** – Tencent

 Chinese equivalent of FAANG.

---

11. BATX

- **B** – Baidu
- **A** – Alibaba
- **T** – Tencent
- **X** – Xiaomi

---

12. TMD (India)

- **T** – TCS
- **M** – Infosys / Mahindra Tech
- **D** – Wipro / HCL (varies)

 Informal, not standardized.

---

13. IND-SAAS / India SaaS Leaders (Unofficial)

Examples:

- Zoho
- Freshworks
- Postman

 AI-Focused Company Groupings (Trending)

14. AI Big Tech Cluster

- Google (DeepMind)
- Microsoft (OpenAI partner)
- Meta (AI Research)
- Amazon (AWS AI)
- NVIDIA (AI hardware leader)

---

15. MAGMA (AI/Cloud Context)

- **M** – Microsoft
- **A** – Amazon
- **G** – Google
- **M** – Meta
- **A** – Apple

 Finance / Stock Market Variants

16. FAAMNG

- Facebook
- Apple
- Amazon
- Microsoft
- Netflix
- Google

---

17. GRANOLAS (Europe – Goldman Sachs term)

- GSK
- Roche
- ASML
- Nestlé
- Novartis
- Novo Nordisk
- L'Oréal
- LVMH
- AstraZeneca
- SAP

 European "stable giants" group.

 Key Insight

These acronyms are:

- **Not official**
- **Change over time**
- Used in:
    - Stock market analysis
    - Tech hiring culture
    - Startup comparisons

 Simple Understanding

- **FAANG / MAANG → Old Big Tech**
- **MAMAA / MATANA → Modern Big Tech**
- **BAT → China Tech**
- **AI clusters → Future Tech Powerhouses**

If you want, I can also give:
✅ **Top 50 product-based companies like MAANG (for jobs)**
✅ **Full roadmap to get into MAANG-level companies**
✅ **India equivalent of FAANG (best companies list)**

Here's a **carefully curated list of 50+ top product-based companies (like MAANG)** that are highly valued for **software engineering jobs, high salaries, and strong tech culture**

Tier 1: MAANG-Level (Dream Companies)

These are the closest to MAANG in **pay, scale, and impact**

- Google
- Microsoft
- Amazon
- Apple
- Meta
- Netflix
- NVIDIA
- Tesla
- Adobe
- Salesforce

Tier 2: High-Paying Product Companies

Very strong engineering culture + great compensation

- Uber
- Airbnb
- LinkedIn
- Twitter
- Stripe
- Square
- PayPal
- Atlassian
- Dropbox
- Shopify

□ Tier 3: Strong Global Product Companies

Great for growth + global exposure

- Oracle
- SAP
- ServiceNow
- Snowflake
- Databricks
- Zoom
- Slack
- Twilio
- HubSpot
- Workday

□□ Tier 4: Top Product-Based Companies in India

Best mix of **salary + work-life + growth**

- Flipkart
- Swiggy
- Zomato
- Paytm
- PhonePe
- Razorpay
- Freshworks
- Zoho
- CRED
- Meesho

□ Tier 5: AI / Future Tech Companies (Very High Demand)

Best for **AI/ML, GenAI, future-proof careers**

- OpenAI
- Anthropic
- DeepMind
- Cohere
- Hugging Face
- Stability AI
- Perplexity AI
- Scale AI
- UiPath
- Palantir

□ Bonus: Hidden Gems (Very High Growth)

Underrated but excellent engineering culture

- Canva
- Figma
- Notion
- Asana
- GitLab
- Cloudflare
- Okta
- Roblox
- Epic Games
- Unity

□ Quick Summary

Tier	Focus	Examples
Tier 1	Elite (MAANG level)	Google, Microsoft
Tier 2	High Pay	Uber, Stripe
Tier 3	Enterprise	Oracle, SAP
Tier 4	India Product	Flipkart, Razorpay
Tier 5	AI Future	OpenAI, NVIDIA

□ Pro Tip (Very Important)

If your goal is **₹20L – ₹1Cr+ salary**, focus on:

□ DSA + System Design + Real Projects
□ Target Tier 1 + Tier 2 companies first
□ Then move to AI/Cloud specialization

If you want next step, I can give:
✅ **Exact roadmap to crack these companies (step-by-step)**
✅ **Top interview questions (DSA + System Design)**
✅ **Resume template for MAANG-level jobs**

Here's a **clear, no-nonsense roadmap to crack MAANG-level / top product-based companies** — structured exactly how successful candidates prepare

 COMPLETE ROADMAP (0 → MAANG Job)

 PHASE 1: Strong Foundations (0–2 Months)

 Goal: Become comfortable with core programming

✅ **What to learn:**

- One language (pick one):
  - Java (best for you)
  - Python / C++
- Core concepts:
  - Variables, loops, functions
  - OOP (very important for Java)
  - Collections (List, Map, Set)

 Practice:

- 50–100 basic problems
- Platforms:
  - LeetCode (Easy)
  - HackerRank

 PHASE 2: DSA Mastery (2–6 Months)

 Goal: Crack coding rounds

 Topics (Must Cover 100%)

1. Arrays & Strings
2. Hashing
3. Recursion & Backtracking
4. Linked List
5. Stack & Queue
6. Trees (Very Important ⭐)
7. Graphs (Very Important ⭐)
8. Dynamic Programming (Hard but critical)

Problem Strategy

- Solve **300–500 problems total**
- Pattern-based learning:
  - Sliding Window
  - Two Pointer
  - Binary Search
  - DFS/BFS

Daily Plan

- 2–3 problems/day
- 1 revision day/week
- Re-solve wrong problems

PHASE 3: System Design (4–8 Months)

Goal: Crack SDE-2 / experienced roles

Learn:

Low-Level Design (LLD)

- OOP Design
- Design Patterns (Singleton, Factory, etc.)
- Class diagrams

High-Level Design (HLD)

- Scalability concepts
- Load balancing
- Caching (Redis)
- Databases (SQL vs NoSQL)
- Microservices

Practice Questions:

- Design WhatsApp
- Design YouTube
- Design URL Shortener

PHASE 4: Core CS Subjects (Parallel)

Goal: Clear interviews confidently

Must Study:

- DBMS (SQL queries + normalization)
- OS (threads, memory, deadlocks)
- Computer Networks (HTTP, TCP/IP)
- OOPs (very important)

PHASE 5: Real Projects (Very Important)

Goal: Stand out in resume

Build 2–4 strong projects:

✅ **Example Ideas:**

- Full-stack web app (Spring Boot + React)
- AI project (like your current work)
- URL shortener (system design project)
- Chat application (real-time)

Pro Tip:

Use:

- REST APIs
- Docker
- Cloud (AWS basics)

□ PHASE 6: Resume + Profile

□ Goal: Get interview calls

✅ Resume Rules:

- 1 page only
- Strong projects
- Quantify impact:
  - ❌ "Built app"
  - ✅ "Built app handling 10,000 users"

□ Platforms:

- LinkedIn (optimize profile)
- GitHub (clean projects)

□ PHASE 7: Mock Interviews (Critical)

□ Goal: Convert interviews

□ Practice:

- LeetCode mock
- Pramp / InterviewBit
- Peer mock interviews

□ Focus:

- Communication
- Thinking approach
- Edge cases

□ PHASE 8: Apply Smartly

□ Goal: Get shortlisted

□ Where to apply:

- Company careers page
- Referrals (VERY IMPORTANT □)
- LinkedIn jobs

□ Strategy:

- Apply to 50–100 companies
- Track applications in Excel

□ REALISTIC TIMELINE

Level	Time Required
Beginner → Job Ready	6–9 months
Average → MAANG	8–12 months
With experience	3–6 months

□ DAILY SCHEDULE (BEST PRACTICE)

- 2 hrs → DSA
- 1 hr → Core CS
- 1 hr → Project / System Design

□ FINAL STRATEGY (MOST IMPORTANT)

□ Don't just "watch tutorials"
□ Focus on **problem-solving + consistency**
□ Repetition is the key

COMMON MISTAKES (AVOID)

❌ Only watching YouTube
❌ Not revising problems
❌ Ignoring system design
❌ No real projects

SUCCESS FORMULA

DSA + Projects + System Design + Consistency = MAANG Job

If you want next step, I can give you:

✅ **300 DSA questions list (company-wise)**
✅ **System Design interview cheat sheet**
✅ **Java + Spring Boot project with full code (ready for resume)**
