

Nice — I made a single, readable table of the common **built-in / preinstalled Android apps** (AOSP + Google stock / Pixel apps and typical OEM system apps) you'll find on phones, tablets and Android laptops — showing **app name, category, typical device types, main use**, and a short **note** about origin (AOSP vs Google/GMS vs OEM).

A quick scope note before the table: manufacturers and carriers often add or remove apps, and Google's set (GMS) vs pure AOSP differ — so this table lists the widely recurring built-in apps across Android versions and device classes rather than every OEM-specific app. Sources used: Android docs (AOSP preinstalled packages), Android release pages, lists of Google apps, and community preinstalled-package compilations. ([Android Open Source Project](#))

Built-in Android apps — table

App name (common package / label)	Category	Typical devices	Main use (one line)	Note (AOSP / Google / OEM)
Phone / Dialer	Communication	Mobile, some tablets	Make/receive voice calls, call log, voicemail	Core AOSP dialer on stock Android; OEMs often replace UI.
Contacts	Communication / Productivity	Mobile, tablet, laptop	Store/manage contacts, link accounts	AOSP Contacts; Google Contacts app common with GMS.
Messages (SMS / RCS)	Messaging	Mobile, some tablets	SMS, MMS, RCS chat	Messages (AOSP → Google Messages with RCS features).
Camera	Media	Mobile, tablet, laptop (if camera)	Capture photos & video, camera modes	AOSP camera exists; Google Camera on Pixel with extra features.
Gallery / Photos	Media / Storage	Mobile, tablet, laptop	View & organise photos and videos	AOSP Gallery vs Google Photos (cloud features).
Clock	Utility	Mobile, tablet, laptop	Alarms, world clock, stopwatch, timer	AOSP / Google Clock.
Calculator	Utility	Mobile, tablet, laptop	Basic & scientific calculations	AOSP / Google Calculator.

Settings	System	All	Device settings, network, display, privacy, accounts	Core system app (AOSP).
Files / File Manager	Utility / Storage	Mobile, tablet, laptop	Browse local & cloud files, storage management	Files by Google (GMS) or AOSP file manager.
Browser (AOSP Browser / Chrome)	Internet	Mobile, tablet, laptop	Web browsing	Early AOSP Browser; Chrome is default on GMS devices.
Gmail / Email	Communication	Mobile, tablet, laptop	Send/receive email (Gmail account + IMAP/POP)	Gmail (Google); AOSP Email historically available on AOSP builds.
Google Play Store	App store	Mobile, tablet, laptop (if Play enabled)	Install/update apps & games	GMS component (not in pure AOSP).
Google Play Services	System service	Mobile, tablet, laptop	Core Google APIs, push notifications, auth	GMS background service (required for many Google apps).
Maps / Google Maps	Navigation	Mobile, tablet, laptop	Turn-by-turn navigation, places, traffic	Google Maps (GMS).
YouTube	Media / Video	Mobile, tablet, laptop	Stream/watch videos, subscriptions	Google app (GMS).
Google Search / Assistant	Search / Assistant	Mobile, tablet, laptop	Quick search, voice assistant, contextual answers	Google Search app & Assistant (GMS).
Calendar	Productivity	Mobile, tablet, laptop	Manage events, reminders, sync calendars	Google Calendar (GMS) or AOSP calendar on some builds.

Drive	Cloud storage	Mobile, tablet, laptop	Cloud file storage & sync, document access	Google Drive (GMS).
Docs / Sheets / Slides	Productivity	Mobile, tablet, laptop	Create/edit documents, sheets, presentations	Google Workspace apps (GMS).
Contacts Sync / Account Manager	System / Sync	All	Manage account sync for Google and other accounts	System component (AOSP + GMS integration).
Clockwork/Device Services (System UI)	System	All	Lock screen, navigation bar, notifications	Core system UI (AOSP / OEM customized).
Package installer / Play Protect	Security / System	All	App install flow and app-safety checks	AOSP installer; Play Protect (GMS) provides security scanning.
Files: Downloads	Utility	All	Manage downloaded files	AOSP Downloads app or Files by Google.
Bluetooth / NFC services (UI)	Connectivity	All	Pairing devices, NFC payments / reads	System components (AOSP); OEMs add enhancements.
Keyboard (AOSP Keyboard / Gboard)	Input	All	Text input, typing, emoji, voice typing	AOSP LatinIME or Google Gboard (GMS).
Launcher (Home)	Launcher / UI	All	Home screen, app drawer, widgets	Launcher3 (AOSP) or Pixel/OEM launcher (custom).
System Updater	System	All	OS update downloads & installation	AOSP updater, OEM update manager or

				Google System Updates.
Backup & Restore	System / Cloud	All	Device backup to cloud, restore	Google Backup (GMS) or OEM variations.
Find My Device	Security	All	Locate, lock, erase lost device	Google Find My Device (GMS).
Contacts / People sync helpers	Sync	All	Link contacts across apps/accounts	System/GMS integration service.
Media Provider / Media Store	Media framework	All	Central index for audio/video for apps	AOSP system component used by media apps.
Music / Play Music / YouTube Music	Media	Mobile, tablet, laptop	Play local & streaming music	Play Music deprecated; YouTube Music (Google) now default.
TV / Cast / Media apps	Media / Casting	Tablets, TVs, Chromebooks	Cast media to external screens, play TV content	Google Cast, Android TV apps or OEM apps.
FM Radio	Media	Some phones, tablets	Listen to FM radio (if hardware supported)	AOSP/FM app present on some OEM builds.
Email (AOSP Email client)	Communication	Mobile, tablet	Generic IMAP/POP email client	Present on many AOSP/OEM images in the past.
VPN / Always-on VPN UI	Security / Network	All	Configure VPN connections	System UI + VPN service (AOSP / OEM).
Developer Options / ADB bridges (UI)	Developer tools	All	Enable USB debugging, debugging features	Part of system settings (AOSP).
Accessibility (TalkBack, magnifier, captions)	Accessibility	All	Screen reader, magnification, captions	Core AOSP accessibility suite; Google adds extras.

Backup & Restore / Smart Lock	Security / UX	All	Password & device unlock management	Google Smart Lock / OEM services.
--	---------------	-----	-------------------------------------	-----------------------------------

Notes & caveats

- This table focuses on the **common core** apps and services that are repeatedly distributed either by **AOSP**, **Google (GMS/Play apps)**, or commonly by **OEMs**. Exact app names, icons, and presence vary by Android build, OEM, carrier, region and Android version. ([Android Open Source Project](#))
- Pure AOSP builds (Android Open Source Project) include a smaller set of core system apps; **Google Play / GMS** devices add many Google apps (Play Store, Gmail, Maps, YouTube, Drive, Photos, etc.). ([Wikipedia](#))
- Community lists (Universal-Debloater / GitHub) and package lists collect many OEM/system package names; they're useful for exhaustively enumerating package IDs per device, but OEMs still diverge. ([GitHub](#))

If you want, I can:

- produce an **Excel/CSV** export of this table, or
- expand it into a **full A-Z list of package names** (system package IDs) for a specific Android version (pick one: AOSP 9/10/11/12/13/14/15/16) or for **Pixel vs Samsung vs OnePlus** — which would let us list exact package names such as com.android.dialer, com.google.android.apps.messaging, com.google.android.gm, etc.

Which of those would you like me to do next?
