Perfect! I'll create a **comprehensive table of 100+ AI libraries**, categorized by AI type, showing **library name, programming language, primary use-case, and link/reference**. This will cover all major AI domains.

---

Here's the **full table**:

| # | Library | Language | AI Type / Domain | Primary Use / Notes | Link / Reference |
|---|---|---|---|---|---|
| **1** | AlphaFold | Python | Specialized AI | Protein structure prediction | https://www.deepmind.com/research/case-studies/alphafold |
| **2** | DeepMind Lab | Python | Specialized AI | 3D RL and AI experiments | https://deepmind.com/research/open-source/deepmind-lab |
| **3** | FastAI | Python | Specialized AI | Simplified DL (vision, NLP, tabular) | https://www.fast.ai |
| **4** | OpenPose | Python, C++ | Specialized AI | Human pose estimation | https://github.com/CMU-Perceptual-Computing-Lab/openpose |
| **5** | SpeechBrain | Python | Specialized AI | Speech recognition | https://speechbrain.github.io |
| **6** | DeepSpeech | Python, C++ | Specialized AI | Speech-to-text | https://github.com/mozilla/DeepSpeech |
| **7** | Kaldi | C++ | Specialized AI | Speech recognition | https://kaldi-asr.org |
| **8** | PyCaret | Python | Specialized AI | Low-code ML/AI | https://pycaret.org |
| **9** | DeepChem | Python | Specialized AI | Chemistry, drug discovery | https://deepchem.io |
| **10** | RDKit | Python, C++ | Specialized AI | Cheminformatics | https://www.rdkit.org |
| **11** | OpenAI Whisper | Python | Specialized AI | Speech recognition | https://github.com/openai/whisper |

| | | | | | |
|---|---|---|---|---|---|
| **12** | OpenAI Gym | Python | RL | RL environments | https://gym.openai.com |
| **13** | Stable Baselines3 | Python | RL | RL algorithms | https://github.com/DLR-RM/stable-baselines3 |
| **14** | RLlib | Python | RL | Scalable RL | https://docs.ray.io/en/latest/rllib.html |
| **15** | TensorForce | Python | RL | RL framework | https://tensorforce.readthedocs.io |
| **16** | Dopamine | Python | RL | RL research framework | https://github.com/google/dopamine |
| **17** | Keras-RL | Python | RL | RL with Keras | https://github.com/keras-rl/keras-rl |
| **18** | Unity ML-Agents | C#, Python | RL | Game-based RL | https://unity.com/products/machine-learning-agents |
| **19** | OpenAI Gym Retro | Python | RL | Classic video games RL | https://github.com/openai/retro |
| **20** | PettingZoo | Python | RL | Multi-agent RL | https://www.pettingzoo.ml |
| **21** | RLCard | Python | RL | Card game RL environments | https://github.com/datamllab/rlcard |
| **22** | Coach | Python | RL | Intel RL framework | https://nervanasystems.github.io/coach/ |
| **23** | Acme | Python | RL | RL framework by DeepMind | https://github.com/deepmind/acme |
| **24** | NLTK | Python | NLP | Tokenization, POS tagging, text processing | https://www.nltk.org |
| **25** | spaCy | Python | NLP | Industrial-strength NLP pipeline | https://spacy.io |
| **26** | Gensim | Python | NLP | Topic modeling, word embeddings | https://radimrehurek.com/gensim |

| | | | | | |
|---|---|---|---|---|---|
| **27** | Transformers | Python | NLP | Pretrained models (BERT, GPT, T5) | https://huggingface.co/transformers |
| **28** | Stanford CoreNLP | Java | NLP | POS, parsing, sentiment analysis | https://stanfordnlp.github.io/CoreNLP |
| **29** | OpenNLP | Java | NLP | NLP tasks (tokenization, parsing) | https://opennlp.apache.org |
| **30** | TextBlob | Python | NLP | Simple NLP tasks | https://textblob.readthedocs.io |
| **31** | AllenNLP | Python | NLP | Research in NLP, deep models | https://allennlp.org |
| **32** | HuggingFace Datasets | Python | NLP | Preprocessing datasets | https://huggingface.co/docs/datasets |
| **33** | SpaCy Transformers | Python | NLP | Transformers in spaCy pipeline | https://spacy.io/universe/project/spacy-transformers |
| **34** | Flair | Python | NLP | State-of-the-art NLP embeddings | https://github.com/flairNLP/flair |
| **35** | Transformers Trainer | Python | NLP | Model training pipeline | https://huggingface.co/docs/transformers/main_classes/trainer |
| **36** | Megatron-LM | Python | NLP | Large-scale transformer training | https://github.com/NVIDIA/Megatron-LM |
| **37** | CLIP | Python | Multi-Modal AI | Image-text similarity | https://github.com/openai/CLIP |
| **38** | OpenCLIP | Python | Multi-Modal AI | Open-source CLIP variant | https://github.com/mlfoundations/open_clip |

| | | | | | |
|---|---|---|---|---|---|
| **39** | FLAVA | Python | Multi-Modal AI | Multi-modal understanding | https://ai.facebook.com/blog/flava-a-foundation-model-for-multi-modal-learning/ |
| **40** | ALIGN | Python | Multi-Modal AI | Image-text learning | https://arxiv.org/abs/2102.05918 |
| **41** | MMF | Python | Multi-Modal AI | Multi-modal frameworks | https://mmf.sh |
| **42** | PyTorch Geometric | Python | ML/DL | Graph neural networks | https://pytorch-geometric.readthedocs.io |
| **43** | DGL | Python | ML/DL | Deep Graph Library | https://www.dgl.ai |
| **44** | Ludwig Preprocessing | Python | ML/DL | Data preprocessing & pipelines | https://ludwig.ai/docs/ |
| **45** | PyTorch Forecasting | Python | ML/DL | Time series forecasting | https://pytorch-forecasting.readthedocs.io |
| **46** | Scikit-learn | Python | ML | Classification, regression, clustering | https://scikit-learn.org |
| **47** | XGBoost | Python, C++ | ML | Gradient boosting for structured data | https://xgboost.ai |
| **48** | LightGBM | Python, C++ | ML | Fast gradient boosting | https://lightgbm.readthedocs.io |
| **49** | CatBoost | Python, C++ | ML | Gradient boosting for categorical features | https://catboost.ai |
| **50** | H2O.ai | Python, Java, R | ML | Scalable ML & AutoML | https://www.h2o.ai |
| **51** | MLlib | Python, Java, Scala | ML | Big data ML (Spark) | https://spark.apache.org/mllib |

| | | | | | |
|---|---|---|---|---|---|
| **52** | Weka | Java | ML | ML algorithms and visualization | https://www.cs.waikato.ac.nz/ml/weka |
| **53** | Orange3 | Python | ML | Visual ML workflow | https://orangedatamining.com |
| **54** | CatLearn | Python | ML | AutoML pipelines | https://github.com/catboost/catlearn |
| **55** | Ludwig | Python | ML | No-code deep learning | https://ludwig.ai |
| **56** | Prophet | Python, R | ML | Time series forecasting | https://facebook.github.io/prophet/ |
| **57** | Kats | Python | ML | Time series analysis | https://github.com/facebookresearch/Kats |
| **58** | Darts | Python | ML | Time series forecasting | https://github.com/unit8co/darts |
| **59** | PyTorch BigGraph | Python | ML | Large graph embeddings | https://github.com/facebookresearch/PyTorch-BigGraph |
| **60** | Ludwig AutoML | Python | ML | AutoML pipelines | https://ludwig.ai |
| **61** | AutoGluon | Python | ML | AutoML toolkit | https://auto.gluon.ai |
| **62** | GAN (TensorFlow/ PyTorch) | Python | Generative AI | Image and data generation | https://keras.io/examples/generative/gan |
| **63** | StyleGAN / StyleGAN2 | Python | Generative AI | High-quality image generation | https://github.com/NVlabs/stylegan2 |
| **64** | DALL·E / OpenAI API | Python | Generative AI | Text-to-image generation | https://openai.com/dall-e |
| **65** | Stable Diffusion | Python | Generative AI | Text-to-image generation | https://stability.ai |
| **66** | VQ-VAE / VQGAN | Python | Generative AI | Image synthesis | https://arxiv.org/abs/1711.00937 |

| | | | | | |
|---|---|---|---|---|---|
| **67** | MusicVAE | Python | Generative AI | Music generation | https://magenta.tensorflow.org/music-vae |
| **68** | DeepDream | Python | Generative AI | Visual pattern generation | https://github.com/google/deepdream |
| **69** | OpenAI Codex | Python | Generative AI | Code generation | https://openai.com/research/codex |
| **70** | Diffusers | Python | Generative AI | Diffusion models | https://huggingface.co/docs/diffusers |
| **71** | TensorFlow | Python, C++ | DL | Neural networks, DL, production | https://www.tensorflow.org |
| **72** | Keras | Python | DL | High-level DL API (TensorFlow backend) | https://keras.io |
| **73** | PyTorch | Python, C++ | DL | Neural networks, research-friendly | https://pytorch.org |
| **74** | MXNet | Python, Scala, C++ | DL | Scalable DL | https://mxnet.apache.org |
| **75** | Chainer | Python | DL | Flexible neural networks | https://chainer.org |
| **76** | Theano | Python | DL | Symbolic tensor computation (legacy) | http://deeplearning.net/software/theano |
| **77** | DL4J | Java | DL | Deep learning in Java | https://deeplearning4j.org |
| **78** | PyTorch Lightning | Python | DL | Research + production DL | https://www.pytorchlightning.ai |
| **79** | JAX | Python | DL | High-performance ML | https://github.com/google/jax |

| | | | | | |
|---|---|---|---|---|---|
| **80** | Haiku | Python | DL | Neural networks for JAX | https://github.com/deepmind/dm-haiku |
| **81** | Optax | Python | DL | Optimizers for JAX | https://github.com/deepmind/optax |
| **82** | PyTorch Lightning Flash | Python | DL | Transfer learning & multimodal | https://lightning.ai/pages/flashes |
| **83** | Colossal-AI | Python | DL | Large model training | https://www.colossalai.org |
| **84** | DeepSpeed | Python | DL | Large-scale model optimization | https://www.deepspeed.ai |
| **85** | PyTorch Hub | Python | DL | Pretrained models | https://pytorch.org/hub |
| **86** | TF Hub | Python | DL | Pretrained models | https://www.tensorflow.org/hub |
| **87** | OpenCV | Python, C++, Java | CV | Image/video processing | https://opencv.org |
| **88** | Pillow / PIL | Python | CV | Image manipulation | https://python-pillow.org |
| **89** | scikit-image | Python | CV | Image processing | https://scikit-image.org |
| **90** | Detectron2 | Python | CV | Object detection, segmentation | https://github.com/facebookresearch/detectron2 |
| **91** | YOLO (Ultralytics) | Python | CV | Real-time object detection | https://github.com/ultralytics/yolov5 |
| **92** | MediaPipe | Python, C++ | CV | Face, hand, pose detection | https://mediapipe.dev |
| **93** | SimpleCV | Python | CV | Computer vision framework | https://github.com/sightmachine/SimpleCV |

| | | | | | |
|---|---|---|---|---|---|
| **94** | Tesseract | C++, Python wrapper | CV | OCR (Optical Character Recognition) | https://github.com/tesseract-ocr/tesseract |
| **95** | Open3D | Python, C++ | CV | 3D data processing | http://www.open3d.org |
| **96** | PyTorch3D | Python | CV | 3D deep learning | https://pytorch3d.org |
| **97** | Detecto | Python | CV | Object detection built on PyTorch | https://detecto.readthedocs.io |
| **98** | ImageAI | Python | CV | Object detection and prediction | https://github.com/OlafenwaMoses/ImageAI |
| **99** | Albumentations | Python | CV | Image augmentation | https://albumentations.ai |
| **100** | OpenMMLab | Python | CV | Modular CV tools | https://open-mmlab.github.io |
| **101** | OpenCV DNN Module | C++, Python | CV | Deep learning in OpenCV | https://docs.opencv.org/ |
| **102** | MMDetection | Python | CV | Object detection | https://github.com/open-mmlab/mmdetection |
| **103** | OpenMMLab MMAction2 | Python | CV | Action recognition | https://github.com/open-mmlab/mmaction2 |
| **104** | Kornia | Python | CV | Computer vision with PyTorch | https://kornia.github.io |

---

This **table covers 100+ libraries** across **all major AI domains**: ML, DL, NLP, CV, RL, Generative AI, Multi-modal AI, and Specialized AI.

---

If you want, I can make a **visual diagram/tree showing all AI types and which libraries fit where**. This is super useful for quick reference and planning AI projects.

Do you want me to create that?
