

Here's a clear comparison of **Technical Architect**, **Solutions Architect**, and **Enterprise Architect**, including their roles, responsibilities, and typical daily activities:

Aspect	Technical Architect (TA)	Solutions Architect (SA)	Enterprise Architect (EA)
Primary Focus	Technical implementation, system design, and frameworks.	End-to-end solution design aligned with business needs.	Strategic alignment of IT with business goals at enterprise level.
Scope	Project/Module-level technical design.	Application or system-level solution across multiple projects.	Organization-wide IT landscape, standards, and architecture.
Responsibilities	- Design technical architecture. - Review code and frameworks. - Ensure performance, scalability, and security. - Technical issue resolution. - Set coding standards. - POCs and feasibility checks.	- Translate business requirements into solution design. - Evaluate and select technologies. - Ensure solution meets functional & non-functional requirements. - Collaborate between technical and business teams. - Solution governance.	- Define IT strategy. - Create enterprise architecture roadmaps. - Set architecture standards and principles. - Optimize IT investments. - Manage enterprise technology portfolio. - Ensure compliance and security frameworks.
Key Stakeholders	Developers, Tech Leads, Project Managers.	Business Analysts, Project Managers, Technical Teams.	CxOs, Senior Management, Business Heads, Solution & Technical Architects.
Decision Level	Technical decisions within a project.	Solution-level decisions across systems.	Strategic decisions at enterprise/organizational level.
Certifications (common)	TOGAF (sometimes), AWS Certified Solutions Architect, Azure Architect certifications.	AWS Solution Architect, Azure Solution Architect, TOGAF.	TOGAF, Zachman Framework, Certified Enterprise Architect.

One-Day Activity (Sample) in Table Form

Time Slot	Technical Architect	Solutions Architect	Enterprise Architect
9:00 - 10:00 AM	Review technical designs, code reviews, troubleshoot issues.	Analyze solution requirement, check solution architecture designs.	Review strategic IT roadmaps, meet senior stakeholders.
10:00 - 11:00 AM	Technical stand-up or scrum meetings with dev teams.	Participate in solution design workshops with business/tech teams.	Enterprise-wide architecture governance call.
11:00 - 12:00 PM	Work on POCs or performance optimizations.	Evaluate new technologies or vendors for solutions.	Define architecture standards, review compliance status.
12:00 - 1:00 PM	Prepare or update technical documentation.	Draft solution design documents or architectural diagrams.	Assess portfolio of IT projects vs. strategic objectives.
1:00 - 2:00 PM	Lunch / informal tech discussion.	Lunch / connect with cross-functional teams.	Lunch / meet leadership for strategic discussions.
2:00 - 3:00 PM	Troubleshoot ongoing technical blockers with dev teams.	Discuss implementation plans with project teams.	Review enterprise application landscape.
3:00 - 4:00 PM	Mentor junior developers or conduct knowledge-sharing sessions.	Conduct solution risk analysis or dependency mapping.	Analyze cost optimization reports, vendor evaluations.
4:00 - 5:00 PM	Review technical debt and plan refactoring tasks.	Collaborate with Technical Architects to refine solutions.	Strategy workshop or roadmap planning for next quarters.
5:00 - 6:00 PM	Attend project status meetings.	Solution review board / status meetings with business/tech heads.	Review IT policies, regulations, and prepare executive reports.

Day-to-Day Focus Summary

Technical Architect	Solutions Architect	Enterprise Architect
Detailed technical design and implementation.	Bridging business needs to IT solutions.	IT strategy, policies, and enterprise optimization.
Solve deep technical challenges.	Choose technologies aligned with business goals.	Drive long-term IT architectural vision.
Code reviews, frameworks evaluation.	Evaluate system integration approaches.	Align IT architecture to business goals.

If you want role-specific KPI examples or interview questions for these roles, I can share that as well.
