

## Customer Support Process

### 1. Customer Raises Issue

Customer contacts support  
E.g. "My app is not working!"

### 2. Ticket Creation

Ticket created with ID  
Ticket #CS-10245

### 3. Categorization

Issue is tagged:  
E.g.. Technical → Login Issue

### 4. Prioritization

Priority set (Low / High)  
E.g.. Marked as High

### 5. Assignment

Assigned to agent  
E.g.. Assigned to L1 Team

### 6. Initial Response

Agent responds to customer:  
E.g.. "Please share error screenshot"

### 7. Troubleshooting

Issue is diagnosed  
E.g.. Reset Password Steps

### 8. Escalation (if needed)

Escalated to L2 / L3 team  
E.g.. Sent to Dev Team

### 9. Resolution

Issue is resolved  
E.g.. Bug Fixed

### 10. Customer Confirmation

Customer confirms fix  
E.g.. "Yes, it's working now!"

### 11. Ticket Closure

Ticket is closed  
E.g.. Status: Closed

### 12. Feedback / CSAT

Customer gives feedback  
E.g.. ★★★★★ Rating

Great topic ☑ — this is **very interview-relevant** and also useful for real job work.

Below is a **clear, structured set of tables** covering  
**(1) Customer Support Process,**  
**(2) Tools & Technologies, and**  
**(3) Common Customer Support Interview Questions.**

---

## 1 Customer Support Process (End-to-End Flow)

| Step | Stage Name             | What Happens                                               | Example                         |
|------|------------------------|------------------------------------------------------------|---------------------------------|
| 1    | Customer Raises Issue  | Customer contacts support via email, call, chat, or ticket | "My app is not working"         |
| 2    | Ticket Creation        | System creates a ticket with ID                            | Ticket #CS-10245                |
| 3    | Categorization         | Issue is tagged (billing, technical, login, etc.)          | Technical → Login issue         |
| 4    | Prioritization         | Ticket is marked Low / Medium / High / Critical            | Login down → High               |
| 5    | Assignment             | Ticket assigned to support agent or team                   | Assigned to L1 agent            |
| 6    | Initial Response (L1)  | Agent acknowledges and asks for details                    | "Please share error screenshot" |
| 7    | Troubleshooting        | Agent follows SOP / knowledge base                         | Reset password steps            |
| 8    | Escalation (if needed) | Issue sent to L2 / L3 / Dev team                           | Backend error → Dev team        |
| 9    | Resolution             | Fix provided or issue resolved                             | Bug fixed                       |
| 10   | Customer Confirmation  | Customer confirms issue is resolved                        | "Yes, it works now"             |
| 11   | Ticket Closure         | Ticket is closed with resolution notes                     | Status: Closed                  |
| 12   | Feedback / CSAT        | Customer gives rating or feedback                          | ★ ★ ★ ★ ★                       |

---

## 2 Customer Support Tools & Technologies

### ☐ Ticketing & CRM Tools

| Tool                    | Category   | Purpose                    |
|-------------------------|------------|----------------------------|
| Zendesk                 | Ticketing  | Manage customer tickets    |
| Freshdesk               | Ticketing  | Email, chat, call support  |
| ServiceNow              | ITSM       | Enterprise-level support   |
| Jira Service Management | IT Support | Tech & bug-related tickets |
| Salesforce              | CRM        | Customer data & history    |
| Zoho Desk               | Ticketing  | Small-mid business support |

---

### ☐ Communication Tools

| Tool                        | Use                           |
|-----------------------------|-------------------------------|
| Email (Outlook, Gmail)      | Formal customer communication |
| Live Chat (Intercom, Drift) | Real-time support             |
| Phone / VoIP (Avaya, Five9) | Voice support                 |
| WhatsApp / Social Media     | Quick customer interaction    |
| Microsoft Teams / Slack     | Internal communication        |

---

### ☐ Knowledge & Documentation Tools

| Tool        | Purpose                |
|-------------|------------------------|
| Confluence  | Knowledge base         |
| Notion      | Internal documentation |
| Google Docs | SOPs & guides          |

|                           |                            |
|---------------------------|----------------------------|
| <b>Help Center / FAQs</b> | Self-service for customers |
|---------------------------|----------------------------|

#### ☐ **Monitoring & Technical Tools (for Tech Support)**

| <b>Tool</b>    | <b>Purpose</b>             |
|----------------|----------------------------|
| <b>Grafana</b> | System monitoring          |
| <b>Kibana</b>  | Log analysis               |
| <b>Splunk</b>  | Error & event tracking     |
| <b>Postman</b> | API testing                |
| <b>SQL</b>     | Data & issue investigation |

### **3 Customer Support Metrics (KPIs)**

| <b>KPI</b>  | <b>Meaning</b>              |
|-------------|-----------------------------|
| <b>CSAT</b> | Customer Satisfaction Score |
| <b>FCR</b>  | First Contact Resolution    |
| <b>AHT</b>  | Average Handling Time       |
| <b>SLA</b>  | Service Level Agreement     |
| <b>TAT</b>  | Turnaround Time             |
| <b>NPS</b>  | Net Promoter Score          |

### **4 Common Customer Support Interview Questions**

#### ☐ **Basic Questions**

| <b>Question</b>                                          | <b>What Interviewer Checks</b> |
|----------------------------------------------------------|--------------------------------|
| <b>What is customer support?</b>                         | Concept clarity                |
| <b>Difference between customer service &amp; support</b> | Understanding                  |

|                                           |                      |
|-------------------------------------------|----------------------|
| <b>What is a ticket?</b>                  | Tool knowledge       |
| <b>What is SLA?</b>                       | Time management      |
| <b>How do you handle angry customers?</b> | Communication skills |

☐ **Scenario-Based Questions**

| <b>Question</b>                                | <b>Expected Skill</b> |
|------------------------------------------------|-----------------------|
| <b>Customer is shouting, what will you do?</b> | Patience & empathy    |
| <b>Issue not in your control</b>               | Escalation handling   |
| <b>Multiple tickets at same time</b>           | Prioritization        |
| <b>Customer wants immediate resolution</b>     | Negotiation           |

☐ **Technical / Process Questions**

| <b>Question</b>                              | <b>Focus Area</b>    |
|----------------------------------------------|----------------------|
| <b>Difference between L1, L2, L3 support</b> | Support structure    |
| <b>How do you escalate a ticket?</b>         | Process              |
| <b>What tools have you used?</b>             | Practical experience |
| <b>How do you document a solution?</b>       | Knowledge sharing    |

☐ **Behavioral Questions**

| <b>Question</b>                           | <b>Why Asked</b> |
|-------------------------------------------|------------------|
| <b>Tell me about a difficult customer</b> | Stress handling  |
| <b>How do you handle pressure?</b>        | Stability        |
| <b>Example of customer satisfaction</b>   | Service mindset  |
| <b>Why should we hire you?</b>            | Confidence & fit |

---

## 5 L1 vs L2 vs L3 Support (Quick Interview Favorite)

| Level | Responsibility                     |
|-------|------------------------------------|
| L1    | Basic issues, FAQs, password reset |
| L2    | Technical troubleshooting          |
| L3    | Code-level / backend fixes         |

---

### ✔ Interview Tip (Important)

**Customer support is not about saying “No” — it’s about saying “Let me help you” professionally.**

If you want, I can also provide:

- ☒ Sample interview answers
- ☒ Customer support resume keywords
- ☒ Role-specific (BPO / IT / SaaS) questions
- ☒ Freshers vs Experienced support interview prep

Perfect ☑ — this is **exactly what recruiters + ATS look for**, especially for **0–3 years of Customer Support experience**.

Below is a **comprehensive, interview-safe, ATS-friendly table** with

☒ **Keyword**

☒ **Meaning (simple English)**

☒ **Real-time / real-job use case**

---

### ☐ Customer Support Resume Keywords (0–3 Years Experience)

#### ☐ Core Customer Support Keywords

| Keyword          | Meaning                          | Real-Time Use Case                  |
|------------------|----------------------------------|-------------------------------------|
| Customer Support | Helping customers resolve issues | Assisting users with login problems |

|                          |                              |                               |
|--------------------------|------------------------------|-------------------------------|
| <b>Customer Service</b>  | Overall customer experience  | Handling queries politely     |
| <b>Helpdesk Support</b>  | Centralized support system   | Working on Freshdesk tickets  |
| <b>Technical Support</b> | Solving technical issues     | Troubleshooting app errors    |
| <b>End-User Support</b>  | Supporting customers/users   | Assisting SaaS product users  |
| <b>Client Support</b>    | Supporting business clients  | Handling B2B customer issues  |
| <b>Issue Resolution</b>  | Fixing customer problems     | Resolving payment failures    |
| <b>Query Handling</b>    | Answering customer questions | Responding to feature queries |

#### ☐ Ticketing & Process Keywords

| <b>Keyword</b>             | <b>Meaning</b>               | <b>Real-Time Use Case</b>        |
|----------------------------|------------------------------|----------------------------------|
| <b>Ticket Management</b>   | Handling support tickets     | Updating ticket status           |
| <b>Ticket Lifecycle</b>    | Ticket start to closure      | Open → In Progress → Closed      |
| <b>SLA</b>                 | Agreed response time         | Resolving high priority in 4 hrs |
| <b>TAT</b>                 | Time taken to resolve        | Closing ticket in 24 hrs         |
| <b>Escalation</b>          | Forwarding complex issues    | Sending issue to L2              |
| <b>Prioritization</b>      | Handling urgent issues first | Critical tickets first           |
| <b>Case Management</b>     | Managing customer cases      | Salesforce case handling         |
| <b>Incident Management</b> | Handling outages/issues      | System down incidents            |

#### ☐ Communication & Soft Skills Keywords

| <b>Keyword</b>                    | <b>Meaning</b>                 | <b>Real-Time Use Case</b> |
|-----------------------------------|--------------------------------|---------------------------|
| <b>Active Listening</b>           | Understanding customer clearly | Listening before replying |
| <b>Professional Communication</b> | Polite & clear talk            | Email & call handling     |
| <b>Empathy</b>                    | Understanding customer emotion | Calming angry customer    |

|                              |                    |                           |
|------------------------------|--------------------|---------------------------|
| <b>Conflict Resolution</b>   | Handling disputes  | Billing disagreement      |
| <b>Verbal Communication</b>  | Spoken interaction | Call support              |
| <b>Written Communication</b> | Email/chat replies | Email support             |
| <b>Customer Handling</b>     | Managing customers | Handling frustrated users |
| <b>Patience</b>              | Staying calm       | Repeated customer calls   |

#### □ Tools & Technology Keywords

| <b>Keyword</b>        | <b>Meaning</b>     | <b>Real-Time Use Case</b> |
|-----------------------|--------------------|---------------------------|
| <b>Zendesk</b>        | Ticketing tool     | Managing tickets          |
| <b>Freshdesk</b>      | Support software   | Chat & email support      |
| <b>ServiceNow</b>     | ITSM platform      | IT support tickets        |
| <b>Jira</b>           | Issue tracking     | Bug escalation            |
| <b>Salesforce</b>     | CRM                | Customer history          |
| <b>CRM</b>            | Customer database  | Tracking customer info    |
| <b>Knowledge Base</b> | Self-help articles | FAQ usage                 |
| <b>Live Chat</b>      | Real-time support  | Website chat              |
| <b>Email Support</b>  | Support via email  | Outlook/Gmail             |

#### □ Technical & IT Support Keywords (Beginner Friendly)

| <b>Keyword</b>             | <b>Meaning</b>         | <b>Real-Time Use Case</b> |
|----------------------------|------------------------|---------------------------|
| <b>Troubleshooting</b>     | Finding root cause     | App crash analysis        |
| <b>Root Cause Analysis</b> | Why issue happened     | Login failure             |
| <b>Application Support</b> | Supporting software    | SaaS app support          |
| <b>System Monitoring</b>   | Watching system health | Checking alerts           |

|                     |                           |                    |
|---------------------|---------------------------|--------------------|
| <b>Log Analysis</b> | Checking error logs       | Kibana logs        |
| <b>Basic SQL</b>    | Simple database queries   | Fetching user data |
| <b>API Basics</b>   | Application communication | Postman testing    |
| <b>Bug Tracking</b> | Tracking defects          | Jira bugs          |

#### ❑ Performance & Metrics Keywords (Very Important for Resume)

| Keyword                | Meaning                     | Real-Time Use Case     |
|------------------------|-----------------------------|------------------------|
| <b>CSAT</b>            | Customer satisfaction score | 4.7/5 rating           |
| <b>FCR</b>             | First call resolution       | Issue fixed first time |
| <b>AHT</b>             | Average handling time       | 6 mins per call        |
| <b>NPS</b>             | Customer loyalty score      | Feedback survey        |
| <b>Quality Score</b>   | Call/chat quality           | QA evaluation          |
| <b>Productivity</b>    | Work efficiency             | Tickets/day handled    |
| <b>Resolution Rate</b> | % of issues resolved        | 95% resolution         |

#### ❑ Experience Level Keywords (0–3 Years Friendly)

| Keyword                      | Meaning                   | Real-Time Use Case |
|------------------------------|---------------------------|--------------------|
| <b>L1 Support</b>            | Basic support             | Password reset     |
| <b>L2 Support (Exposure)</b> | Advanced support          | Debugging errors   |
| <b>Shift Support</b>         | Rotational shifts         | Night shift        |
| <b>Queue Management</b>      | Handling multiple tickets | 20 tickets/day     |
| <b>Multitasking</b>          | Handling many tasks       | Calls + chats      |
| <b>Process Adherence</b>     | Following SOP             | Company workflow   |
| <b>Documentation</b>         | Writing notes             | Ticket updates     |

|                 |                |                   |
|-----------------|----------------|-------------------|
| <b>Training</b> | Learning tools | New hire training |
|-----------------|----------------|-------------------|

#### ☐ Resume Power Action Verbs (ATS Boosters)

| <b>Keyword</b>     | <b>Meaning</b>      | <b>Real-Time Use Case</b> |
|--------------------|---------------------|---------------------------|
| <b>Resolved</b>    | Fixed issues        | Resolved 30 tickets/day   |
| <b>Assisted</b>    | Helped customers    | Assisted 100+ users       |
| <b>Handled</b>     | Managed tasks       | Handled chat support      |
| <b>Coordinated</b> | Worked with teams   | Dev team coordination     |
| <b>Improved</b>    | Made process better | Reduced TAT               |
| <b>Delivered</b>   | Provided results    | Delivered support         |
| <b>Supported</b>   | Provided help       | Supported users           |

#### ✔ How to Use These Keywords in Resume (Golden Tip)

✗ “Handled customer issues”

✔ “Handled **L1 customer support**, managed **Zendesk tickets**, achieved **95% CSAT**, and met **SLA targets**”

If you want, I can:

- ☒ Create a 0–1 year fresher resume
- ☒ Convert BPO support → IT Support resume
- ☒ Give ATS-optimized resume summary
- ☒ Prepare HR + Technical interview answers

Below is a **clear, practical, interview-ready guide** for **Customer Support interviews**, split into:

- 1 Freshers (0–1 year)
- 2 Experienced (1–3 years)
- 3 HR Interview Q&A (with strong sample answers)
- 4 Technical / Process Interview Q&A

Everything is written in **simple, real interview language** — you can **speak these answers directly**.

---

## 1 FRESHERS – Customer Support Interview Preparation

### What Interviewers Expect from Freshers

- Good communication
  - Positive attitude
  - Willingness to learn
  - Basic understanding of support process
  - Calm behavior under pressure
- 

### ☐ HR Interview Questions – Freshers (With Answers)

#### Q1. Tell me about yourself.

**Answer:**

I am a graduate and a fresher in customer support. I have good communication skills and basic knowledge of customer service processes like ticket handling, escalation, and SLA. I am a quick learner and comfortable working in shifts. I am looking for an opportunity where I can learn and grow while delivering good customer experience.

---

#### Q2. Why do you want to work in customer support?

**Answer:**

I enjoy helping people and solving problems. Customer support allows me to interact with customers, improve my communication skills, and understand real business issues. It is also a good starting point to learn about products, processes, and professional work culture.

---

**Q3. How will you handle an angry customer?**

**Answer:**

First, I will listen patiently without interrupting. Then I will apologize for the inconvenience and assure the customer that I will help. I will understand the issue clearly and provide the best possible solution or escalate it if needed.

---

**Q4. Are you comfortable with night shifts and targets?**

**Answer:**

Yes, I am comfortable with rotational shifts and targets. I understand customer support is a 24/7 role, and I am flexible as long as I get learning and growth opportunities.

---

☐ **Technical / Process Questions – Freshers**

**Q5. What is customer support?**

**Answer:**

Customer support is helping customers resolve issues, answering their queries, and ensuring they have a good experience with the product or service.

---

**Q6. What is a ticket?**

**Answer:**

A ticket is a recorded customer issue or request in a support system. It helps track the issue from creation to resolution.

---

**Q7. What is SLA?**

**Answer:**

SLA stands for Service Level Agreement. It defines the expected response and resolution time for customer issues.

---

---

## **2 EXPERIENCED – Customer Support Interview Preparation (1–3 Years)**

### **What Interviewers Expect from Experienced Candidates**

- Real tool exposure
  - Process knowledge
  - Ownership
  - Metrics awareness
  - Escalation handling
- 

### **☐ HR Interview Questions – Experienced (With Answers)**

#### **Q1. Tell me about your experience.**

**Answer:**

I have around 2 years of experience in customer support, mainly handling L1 technical issues. I have worked on ticketing tools like Zendesk/Freshdesk, managed email and chat support, met SLA targets, and maintained CSAT above 95%. I also coordinated with L2 teams for escalations.

---

#### **Q2. Why are you looking for a change?**

**Answer:**

I am looking for better growth opportunities, exposure to advanced support processes, and a chance to work on new tools and technologies.

---

#### **Q3. How do you handle high ticket volume?**

**Answer:**

I prioritize tickets based on SLA and impact, use predefined templates, multitask efficiently, and escalate issues early when required to avoid SLA breaches.

---

#### ☐ **Technical / Process Questions – Experienced**

**Q4. Explain L1, L2, and L3 support.**

**Answer:**

L1 handles basic issues like password reset and FAQs. L2 handles deeper technical troubleshooting. L3 works on backend or code-level issues.

---

**Q5. What tools have you used?**

**Answer:**

I have used Zendesk/Freshdesk for ticket management, Jira for bug tracking, and basic CRM tools for customer data.

---

**Q6. What is CSAT and how do you improve it?**

**Answer:**

CSAT measures customer satisfaction. I improve it by responding on time, communicating clearly, resolving issues on the first contact, and following up properly.

---

### **3 COMMON SCENARIO-BASED QUESTIONS (FRESHERS + EXPERIENCED)**

**Q. Customer wants immediate resolution but issue needs escalation.**

**Answer:**

I will explain the process politely, set realistic expectations, escalate the issue with proper details, and keep the customer informed until resolution.

---

**Q. You made a mistake while handling a ticket. What will you do?**

### Answer:

I will immediately inform my supervisor, correct the mistake, and ensure it does not happen again by following SOP.

---

---

#### 4 QUICK DIFFERENCE: FRESHER vs EXPERIENCED ANSWERS

| Topic           | Fresher Focus    | Experienced Focus |
|-----------------|------------------|-------------------|
| <b>Tools</b>    | Basic knowledge  | Hands-on          |
| <b>Metrics</b>  | Awareness        | Achievement       |
| <b>Handling</b> | Learning mindset | Ownership         |
| <b>Answers</b>  | Theoretical      | Real examples     |

---

#### ✓ FINAL INTERVIEW GOLDEN LINES (Use Anywhere)

- “I focus on **customer satisfaction and SLA compliance.**”
  - “I believe in **listening first, then solving.**”
  - “I escalate issues early to **avoid SLA breach.**”
  - “I document every case properly for **future reference.**”
- 

If you want next:

- ☒ **Mock interview (HR + Tech)**
- ☒ **Role-play angry customer calls**
- ☒ **BPO → IT support transition answers**
- ☒ **Ready-to-copy interview scripts**

Let's do this **exactly like a real interview + real job calls.**  
You can **read, practice, and directly speak these answers.**

I'll cover **ALL 4 things** step-by-step.

---

## **1 MOCK INTERVIEW – HR + TECH (REAL INTERVIEW STYLE)**

### **☐ HR ROUND – Mock Questions & Strong Answers**

**HR Q1: Tell me about yourself.**

**Answer (Universal – Fresher / BPO / IT Support):**

I have experience in customer support where I handled customer queries through calls, emails, and tickets. I am comfortable working with ticketing systems, following SLA, and handling escalations when required. I focus on clear communication and customer satisfaction, and now I want to grow towards more technical and IT support roles.

---

**HR Q2: Why should we hire you?**

**Answer:**

I have hands-on customer handling experience, good communication skills, and a problem-solving mindset. I follow processes strictly, meet SLA timelines, and I am eager to learn technical skills required for IT support.

---

**HR Q3: How do you handle work pressure?**

**Answer:**

I stay calm, prioritize tasks based on urgency, and focus on one issue at a time. I also follow SOPs and escalate issues early if required to avoid delays.

---

**HR Q4: Why are you shifting from BPO to IT support?**

**Answer:**

BPO helped me build strong communication and customer handling skills. Now I want to apply these skills in IT support, where I can work more on technical troubleshooting, systems, and long-term career growth.

---

## **2 TECHNICAL MOCK INTERVIEW (L1 / ENTRY-LEVEL IT SUPPORT)**

**Tech Q1: Explain customer support process.**

**Answer:**

Customer raises an issue, a ticket is created, categorized, prioritized, assigned to an agent, troubleshooting is done, escalated if needed, resolved, confirmed by customer, and then closed with feedback.

---

**Tech Q2: What tools have you used?**

**Answer:**

I have worked with ticketing tools like Freshdesk/Zendesk, email support, CRM systems, and basic Jira exposure for bug tracking.

---

**Tech Q3: What will you do if you don't know the solution?**

**Answer:**

I will check the knowledge base, follow SOPs, and if required, escalate to L2 with proper documentation while keeping the customer informed.

---

**Tech Q4: What is SLA and why is it important?**

**Answer:**

SLA defines response and resolution timelines. It is important to maintain customer trust and service quality.

---

## **3 ROLE-PLAY: ANGRY CUSTOMER CALL (REALISTIC)**

☐ **Scenario: App not working, customer angry**

**Customer:**

I've been calling since morning! Your app is useless!

**You (Perfect Answer):**

I understand how frustrating this must be, and I sincerely apologize for the inconvenience. Let me quickly check the issue and help you get this resolved as soon as possible. May I please confirm your registered email ID?

**Customer:**

Why does this always happen?

**You:**

I completely understand your concern. I am checking this right now and will make sure we either resolve it immediately or escalate it with priority.

✓ *Key points interviewer checks:*

✓Calm

✓Empathy

✓Ownership

✓Control of call

---

**4 BPO → IT SUPPORT TRANSITION ANSWERS (VERY IMPORTANT)**

**Q: You are from BPO. How will you handle IT support?**

**Answer:**

In BPO, I handled customers, followed SLAs, documented issues, and worked with internal teams. IT support requires the same skills plus technical troubleshooting. I am actively learning system basics, application support, and ticket tools, so the transition is natural for me.

---

**Q: Do you have technical knowledge?**

**Answer:**

Yes, I have basic knowledge of application troubleshooting, ticket categorization, escalation processes, and I am continuously improving my technical skills through practice and learning.

---

## 5 READY-TO-COPY INTERVIEW SCRIPTS (SAVE THESE)

### ☐ Opening Line

Thank you for giving me this opportunity.

### ☐ When You Don't Know Answer

I may not have worked on this directly, but I understand the process and I'm eager to learn.

### ☐ Escalation Line

I will escalate this issue to the concerned team with complete details to avoid delay.

### ☐ Customer Satisfaction Line

My focus is always on resolving the issue within SLA while keeping the customer informed.

---

## 6 FINAL INTERVIEW CHEAT CODE (MEMORIZE)

| Situation      | What to Say                      |
|----------------|----------------------------------|
| Angry customer | "I understand and I'll help you" |
| Pressure       | "I prioritize and follow SLA"    |
| Mistake        | "I inform and correct quickly"   |
| Technical gap  | "I learn fast and escalate"      |

---

### ☐ NEXT LEVEL PRACTICE (Optional)

If you want, I can:

- ☐ Take a **live mock interview** (you answer, I evaluate)
- ☐ Do **voice-style call scripts**
- ☐ Build **BPO → IT Support resume**
- ☐ Prepare **company-specific interviews**

Just tell me **which one** and I'll start immediately ☐
