Here's a **detailed comparison table** of **AWS**, **Azure**, and **GCP subscription types**, including their **types**, **features**, **target audience**, and **differences**:

Cloud Subscription Types Comparison: AWS vs Azure vs GCP

Cloud Provider	Subscription / Account Type	Description / Features	Target Audience	Free Tier / Trial	Billing Model
AWS (Amazon Web Services)	**AWS Free Tier**	12-month free usage of selected services (EC2, S3, RDS, Lambda, etc.) with usage limits	Beginners, Learners	Yes – 12-month free + always free tier	Pay-as-you-go
	Pay-As-You-Go (On-Demand)	Standard AWS account, billed monthly for actual resource usage	Startups, SMEs, Enterprises	No	Pay-as-you-go
	Savings Plans / Reserved Instances	Prepay or commit to long-term usage (1 or 3 years) for discounts	Enterprises with predictable workloads	No	Upfront or monthly commitment
	Enterprise Support Plan	Business-critical support, TAM (Technical Account Manager), 24/7 premium support	Large Enterprises	No	Subscription + Usage-based

	Consolidated Billing (Organizations)	Manage multiple AWS accounts under one payer	Enterprises, MSPs	No	Consolidated Pay-as-you-go
	AWS GovCloud (US)	Isolated cloud region for US government customers	Government, Defense	No	Pay-as-you-go
	AWS Education / Training Accounts	AWS credits for students/institutes via AWS Educate / Academy	Students, Universities	Yes (credits)	N/A or limited use

---

Cloud Provider	Subscription / Account Type	Description / Features	Target Audience	Free Tier / Trial	Billing Model
Azure (Microsoft Azure)	**Azure Free Account**	12-month free + ₹16,500 ($200) credits + always-free services	Beginners, Developers	Yes – 12-month free + ₹16,500 credits	Pay-as-you-go
	Pay-As-You-Go	Standard subscription; billed monthly based on usage	SMEs, Startups, General Use	No	Usage-based billing
	Enterprise Agreement (EA)	Volume licensing for large enterprises; committed spend, lower pricing	Large Enterprises	No	Committed or pay-as-you-go

	Microsoft Customer Agreement (MCA)	Simplified billing for organizations of any size	SMEs, Enterprises	No	Monthly billing
	CSP (Cloud Solution Provider)	Resold Azure through Microsoft partners, ideal for SMBs	Resellers, Partners	No	Partner-billed
	Azure Sponsorship	Free Azure credits to organizations under specific programs	NGOs, Startups, Education	Yes	Credit-based
	Azure for Students	$100 free credits, no credit card required	Students	Yes	Free tier only
	Dev/Test Subscription	Discounted non-production use via Visual Studio subscription	Developers, Testers	Yes (via Visual Studio)	Reduced rate

---

Cloud Provider	Subscription / Account Type	Description / Features	Target Audience	Free Tier / Trial	Billing Model
GCP (Google Cloud Platform)	**GCP Free Tier**	Always-free usage limits + $300 credits valid for 90 days	Developers, Students	Yes – $300 credits + free tier	Usage-based
	Pay-As-You-Go	Regular GCP account with billing as per actual usage	SMEs, Startups	No	Pay-as-you-go

	Committed Use Contracts	Commit to 1- or 3-year usage for heavy discounts	Large Enterprises	No	Prepaid / Monthly commitment
	Sustained Use Discounts	Automatic discounts for consistent use of resources	All Users	Auto-applied	Pay-as-you-go
	GCP for Startups / Education / Non-profits	Free credits or sponsorships for eligible institutions	Startups, NGOs, Students	Yes (via application)	Credit-based
	Google Cloud Enterprise Agreement	Customized billing and pricing for large enterprises	Large Enterprises	No	Commitment-based
	Cloud Identity / Organization Node	Centralized identity and billing for multiple projects	Enterprises	No	Admin + usage-based

---

Key Differences Summary:

Aspect	**AWS**	**Azure**	**GCP**
Free Credits	No general credits (except AWS Educate)	₹16,500 ($200) credits for 30 days	$300 credits for 90 days
Always Free Services	Yes – selected services with limits	Yes	Yes
Student Support	AWS Educate, Academy	Azure for Students	Google Cloud for Students
Long-Term Commitment	Reserved Instances, Savings Plans	EA, MCA, CSP, Dev/Test	Committed Use Contracts

Enterprise Management	Organizations, Billing Consoles	Azure EA, Azure DevOps + Active Directory	Organization Nodes, IAM, Billing Accounts
Trial Duration	12 months (services), no credits	12 months (services) + ₹16,500 ($200) credits	90 days + $300 credits
Government / Compliance	AWS GovCloud, ISO, FedRAMP	Azure Government Cloud, high compliance	Assured Workloads, Government cloud region

---

Conclusion

- **AWS** is flexible for enterprise-grade services with deep discounts via **Reserved Instances** and **Savings Plans**.
- **Azure** offers strong integration with Microsoft tools (like Active Directory, Visual Studio) and has clear paths for **CSP, EA, MCA** licensing.
- **GCP** is developer-friendly, with **auto-discounts**, and a generous **free credit policy** ideal for startups and students.
