Here's a comprehensive list of **AWS services**, categorized into **Built-in Free Tier (Always Free), Free (12 Months), and Premier Paid** services, along with **suggested use cases** – all organized in a **table format** for clarity:

AWS Services Table – Free Tier & Paid

Category	Service Name	Tier	Description / Use Case
Compute	Amazon EC2	Free (750 hrs/mo 12 mos)	Launch virtual servers (VMs) for web servers, app servers, or any backend infrastructure
	AWS Lambda	Always Free (1M req/mo)	Serverless compute to run code in response to triggers (HTTP, S3, Cron, etc.)
	AWS Elastic Beanstalk	Premier Paid	Deploy and scale web applications automatically
	Amazon Lightsail	Premier Paid	Simple VPS for websites and apps
	AWS Batch	Premier Paid	Run batch computing jobs efficiently
Containers	Amazon ECS	Always Free (limited)	Container orchestration (like Docker) for microservices or API backends
	Amazon EKS	Premier Paid	Managed Kubernetes for container orchestration
	AWS Fargate	Premier Paid	Serverless container hosting
Storage	Amazon S3	Always Free (5GB)	Object storage for images, videos, documents, backups
	Amazon EBS	Free (30GB 12 mos)	Block storage for EC2 (OS or application drives)

	Amazon Glacier / S3 Glacier	Premier Paid	Archival, long-term low-cost data storage
	AWS Backup	Premier Paid	Centralized backup across AWS services
Database	Amazon RDS	Free (750 hrs/mo 12 mos)	Managed relational DBs like MySQL, PostgreSQL, etc.
	Amazon DynamoDB	Always Free (25GB)	NoSQL database for high-performance apps
	Amazon Aurora	Premier Paid	High-performance MySQL/PostgreSQL-compatible DB
	Amazon ElastiCache	Premier Paid	In-memory cache for DB acceleration (Redis/Memcached)
	Amazon Neptune	Premier Paid	Graph database for connected data
	Amazon Timestream	Premier Paid	Time-series database for IoT and operational metrics
Networking & CDN	Amazon VPC	Always Free	Launch isolated virtual networks for your cloud resources
	AWS CloudFront	Free (50GB 12 mos)	CDN to deliver content faster across the globe
	AWS Route 53	Premier Paid	Scalable domain name system (DNS) service
	AWS Direct Connect	Premier Paid	Dedicated private network connection to AWS
	Elastic Load Balancing (ELB)	Premier Paid	Distribute traffic across multiple targets (EC2, containers)
Developer Tools	AWS CodeCommit	Always Free (5 active users)	Source control (Git repository)

	AWS CodeBuild	Always Free (100 build min)	CI/CD build service
	AWS CodeDeploy	Always Free	Automate deployment of code to EC2, Lambda, etc.
	AWS CodePipeline	Premier Paid	Continuous integration and delivery pipeline
	AWS Cloud9	Always Free	Online IDE for writing, running, and debugging code
Security & Identity	AWS IAM	Always Free	Manage users, permissions, and roles
	AWS Cognito	Always Free (50K MAUs)	User authentication and identity management for web/mobile apps
	AWS Shield	Premier Paid	DDoS protection
	AWS WAF	Premier Paid	Web application firewall
	AWS KMS (Key Management)	Premier Paid	Manage encryption keys
Monitoring & Logging	Amazon CloudWatch	Always Free (5GB logs, 10 custom metrics)	Monitor logs, metrics, and alarms
	AWS CloudTrail	Always Free (90 days events)	Track user activity and API usage
	AWS X-Ray	Premier Paid	Debug and trace microservices
AI & ML	Amazon Rekognition	Free (5K images 12 mos)	Image and video analysis for face, object, and scene detection
	Amazon Comprehend	Free (50K units 12 mos)	NLP for extracting key phrases, sentiment, etc.
	Amazon Lex	Free (10K text req 12 mos)	Build chatbots using voice and text interfaces
	Amazon Polly	Free (5M characters 12 mos)	Text-to-speech conversion

	Amazon SageMaker	Premier Paid	Build, train, and deploy ML models at scale
IoT	AWS IoT Core	Free (250K msg/mo 12 mos)	Connect and manage IoT devices
Analytics & Big Data	Amazon Athena	Premier Paid	Query data in S3 using SQL
	Amazon Redshift	Premier Paid	Data warehouse for BI workloads
	Amazon Kinesis	Premier Paid	Real-time data streaming
	AWS Glue	Premier Paid	ETL service to prepare data for analytics
Migration & Transfer	AWS DMS (Database Migration)	Free (750 hrs 12 mos)	Migrate DBs to AWS
	AWS Snowball	Premier Paid	Petabyte-scale data transfer device
	AWS Migration Hub	Premier Paid	Track and manage migrations
Business Apps	Amazon WorkSpaces	Premier Paid	Virtual desktops for remote teams
	Amazon Chime	Premier Paid	Video conferencing service
	Amazon Connect	Premier Paid	Cloud contact center platform

Notes:

- **Always Free**: Available with every account, forever with usage limits.
- **12 Months Free**: Applies only to new accounts for the first 12 months.
- **Premier Paid**: Pay-as-you-go or reserved pricing, often with free tier trials.
- **Pricing may vary** by region and usage.

Suggested Use Case Examples

Scenario	Suggested AWS Services
Host a dynamic website	EC2 + RDS + S3 + Route 53 + ELB
Serverless web app backend	Lambda + API Gateway + DynamoDB + S3
CI/CD pipeline	CodeCommit + CodeBuild + CodeDeploy + CodePipeline
Static website hosting	S3 (Static hosting) + CloudFront + Route 53
Real-time chat app with authentication	Amazon Lex + Cognito + Lambda + DynamoDB
IoT application with sensor data	AWS IoT Core + Lambda + Timestream
Machine learning pipeline	SageMaker + S3 + Glue + Athena
Data warehouse & analytics platform	Redshift + Glue + S3 + QuickSight
Secure infrastructure with monitoring	IAM + KMS + Shield + WAF + CloudWatch + CloudTrail
