Here's a comprehensive table comparing **AWS services and Laravel services**, showing which ones are **free** and **paid**, their **compatible counterparts**, **suggested use cases**, and **integration tips**:

AWS vs Laravel Services: Free, Paid, Compatible & Integration Table

Category	AWS Service	Free / Paid	Laravel Service	Free / Paid	Suggested Use Case	Compatibility	How to Integrate
Storage	S3 (Simple Storage Service)	Free Tier (5GB) / Paid	Filesystem (S3 Driver)	Free	Store user uploads, images, backups	Compatible	Use Laravel Filesystem s3 driver in config/filesystems.php
Database	RDS (MySQL, PostgreSQL)	Paid	Laravel Eloquent ORM	Free	Web apps needing relational DB	Compatible	Set DB credentials in .env for RDS endpoint
Authentication	Cognito	Free Tier / Paid	Laravel Breeze / Jetstream / Sanctum	Free	User authenticatio n & tokens	Partial	Use Laravel Passport with custom integration using Cognito SDK
Compute / Hosting	EC2	Free Tier (750 hrs/month) / Paid	Laravel App Deployment	Free (Code)	Deploy full Laravel app on virtual servers	Compatible	SSH into EC2, install PHP, Laravel, DB; deploy with Git/CI
Functions / Serverless	Lambda	Free Tier (1M reqs/month) / Paid	Laravel Vapor (by Laravel)	Paid	Run Laravel serverless	Compatible	Use Laravel Vapor to deploy to Lambda via CLI

Email Service	SES (Simple Email Service)	Free Tier (62K emails/month from EC2) / Paid	Laravel Mail	Free	Transactional emails (reset password, OTP)	Compatible	Configure MAIL_MAILER=ses in .env
File CDN / Asset Delivery	CloudFront	Paid	Laravel Mix + S3	Free	Deliver Laravel assets globally	Compatible	Point asset URLs to CloudFront CDN URL
Queueing	SQS (Simple Queue Service)	Free Tier (1M reqs) / Paid	Laravel Queue (SQS Driver)	Free	Background job processing	Compatible	Set QUEUE_CONNECTION= sqs in .env
Monitoring	CloudWatch	Free Tier / Paid	Laravel Telescope	Free	Logs, metrics, debugging	Partial	Use CloudWatch agent on EC2 or push logs via CloudWatch SDK
Notifications	SNS (Simple Notification Service)	Free Tier (1M SMS/month) / Paid	Laravel Notification	Free	SMS, Email, Push Alerts	Compatible	Create SNS topic, integrate via Laravel Notification channels
CI/CD	CodePipeline + CodeDeploy	Free Tier / Paid	Laravel Forge / Envoyer	Paid	Automated deployments	Compatible	Push to GitHub, trigger AWS CI/CD to deploy Laravel app
Object Detection / AI	Rekognition, Comprehend, Textract	Paid	Laravel AI / Custom AI SDKs	Free	Image analysis, NLP	Partial	Use AWS SDK in Laravel to call AI services
Secrets / Key Management	AWS Secrets Manager	Paid	Laravel .env + Vault	Free	Secure config management	Partial	Store secrets in AWS, access via SDK or ENV injection

---

Notes:

- **Free Tier** means AWS gives free usage with limits (e.g., 5GB S3, 750 hours EC2 per month) for **12 months** or **always free**.
- Laravel core services are **free**, but some official SaaS tools like **Vapor**, **Forge**, or **Envoyer** are **paid**.
- **AWS SDK for PHP** is the official way to integrate Laravel with AWS services.
- For queues, emails, files, and DBs, Laravel has **built-in drivers** for AWS (S3, SES, SQS, RDS).
- Use **IAM Roles** or **Access Keys** securely (via .env) for Laravel to interact with AWS.

Example Integration Snippet – Laravel with S3:

```
// .env
FILESYSTEM_DISK=s3
AWS_ACCESS_KEY_ID=your_key
AWS_SECRET_ACCESS_KEY=your_secret
AWS_DEFAULT_REGION=ap-south-1
AWS_BUCKET=your_bucket

// Usage
Storage::disk('s3')->put('example.txt', 'Hello AWS');
```
