

Below is a **comprehensive, industry-oriented list of career opportunities in IT companies**, grouped logically and presented in **table format** for clarity and exam/interview/job-search usefulness.

1. Software Development & Engineering Careers

Career Role	What They Do	Key Skills / Tools
Software Engineer	Design, build, and maintain software systems	Java, Python, C++, OOP
Application Developer	Develop desktop, web, or mobile apps	Java, .NET, Python
Web Developer	Build websites and web apps	HTML, CSS, JS
Frontend Developer	UI/UX and client-side logic	React, Angular, Vue
Backend Developer	Server-side logic and APIs	Java, Node.js, Python
Full Stack Developer	Frontend + Backend	MERN, MEAN, Spring
Mobile App Developer	Android / iOS apps	Kotlin, Swift, Flutter
Embedded Software Engineer	Software for hardware devices	C, C++, RTOS
Game Developer	Build games and engines	Unity, Unreal, C#
System Programmer	Low-level OS/system coding	C, Assembly

2. Data, AI & Analytics Careers

Career Role	What They Do	Key Skills / Tools
Data Analyst	Analyze data for insights	SQL, Excel, Power BI
Data Scientist	Predictive modeling & analysis	Python, ML, Stats
Machine Learning Engineer	Build ML models	TensorFlow, PyTorch
AI Engineer	AI-based systems	NLP, CV, Deep Learning
Big Data Engineer	Handle large-scale data	Hadoop, Spark

Business Intelligence Analyst	Business dashboards & reports	Tableau, Power BI
Data Engineer	Data pipelines & ETL	Airflow, SQL, Python
Statistician	Statistical analysis	R, SAS
NLP Engineer	Language-based AI	BERT, GPT
Computer Vision Engineer	Image/video AI	OpenCV, YOLO

3. Cloud, DevOps & Infrastructure Careers

Career Role	What They Do	Key Skills / Tools
DevOps Engineer	CI/CD, automation	Docker, Jenkins
Cloud Engineer	Cloud infrastructure	AWS, Azure, GCP
Site Reliability Engineer (SRE)	Reliability & uptime	Kubernetes, Linux
System Administrator	Server management	Linux, Windows
Network Engineer	Network design & security	TCP/IP, Cisco
Infrastructure Engineer	IT backbone systems	Virtualization
Platform Engineer	Internal developer platforms	Kubernetes
Build & Release Engineer	Software releases	CI/CD tools

4. Cybersecurity & Risk Careers

Career Role	What They Do	Key Skills / Tools
Cybersecurity Analyst	Monitor threats	SIEM, SOC
Ethical Hacker	Penetration testing	Kali Linux
Security Engineer	Secure systems	Firewalls, IAM
Information Security Analyst	Policies & controls	ISO 27001
SOC Analyst	Incident monitoring	Splunk

Cryptography Engineer	Encryption systems	PKI, SSL
GRC Specialist	Compliance & risk	Audits

5. Testing, QA & Support Careers

Career Role	What They Do	Key Skills / Tools
Software Tester	Manual testing	Test cases
Automation Test Engineer	Automated testing	Selenium, Cypress
QA Engineer	Quality assurance	Agile, JIRA
Performance Tester	Load & stress testing	JMeter
Security Tester	Vulnerability testing	Burp Suite
Technical Support Engineer	Customer technical support	Troubleshooting
Application Support Analyst	App maintenance	Logs, SQL

6. Database & ERP Careers

Career Role	What They Do	Key Skills / Tools
Database Administrator (DBA)	Manage databases	Oracle, MySQL
Database Developer	DB programming	SQL, PL/SQL
Data Warehouse Architect	Analytical DBs	Snowflake
SAP Consultant	ERP implementation	SAP modules
Oracle Consultant	Oracle solutions	Oracle DB
Salesforce Developer	CRM development	Apex
Dynamics 365 Consultant	Microsoft ERP/CRM	D365

7. Product, Project & Management Careers

Career Role	What They Do	Key Skills / Tools
Project Manager	Manage delivery	PMP, Agile
Product Manager	Product vision	Roadmaps
Program Manager	Multi-project control	Strategy
Scrum Master	Agile facilitation	Scrum
Delivery Manager	Client delivery	ITIL
Business Analyst	Requirement analysis	UML, BPMN
Product Owner	Backlog ownership	Agile

8. UI/UX, Design & Creative Careers

Career Role	What They Do	Key Skills / Tools
UI Designer	Interface design	Figma
UX Designer	User experience	Wireframing
UX Researcher	User studies	Research tools
Graphic Designer	Visual assets	Photoshop
Interaction Designer	User interactions	Prototyping
Motion Designer	Animations	After Effects

9. Emerging & Specialized IT Careers

Career Role	What They Do	Key Skills / Tools
Blockchain Developer	Decentralized apps	Solidity
Web3 Engineer	Crypto & DApps	Ethereum
Metaverse Developer	Virtual worlds	Unity, VR

AR/VR Engineer	Immersive tech	Unreal
IoT Engineer	Smart devices	Sensors
Robotics Engineer	Automation systems	ROS
Quantum Computing Researcher	Quantum algorithms	Qiskit
Edge Computing Engineer	Edge AI	Embedded AI

10. IT Non-Coding & Tech-Adjacent Careers

Career Role	What They Do	Key Skills
Technical Recruiter	Hire tech talent	ATS
IT Trainer	Teach technologies	Training skills
Technical Writer	Documentation	Markdown
Pre-Sales Consultant	Tech sales support	Presentations
Solution Architect	System design	Architecture
IT Auditor	System audits	Compliance
Technology Consultant	Client advisory	Domain knowledge
