	Cloud Operations Engineer	☐
	Cloud Architecture Consultant	☐
	Cloud Consultant	☐
	Cloud Support Engineer	☐
	Cloud Analyst	☐
	Cloud Administrator	☐
	Cloud Specialist	☐

Below is a **clear, industry-oriented, India-specific comparison** of all the **Cloud job roles shown in your image**, covering **salary, fastest job path (online vs offline coaching), onsite chances, daily work, work-life balance, shifts, experience, qualifications, and certifications with fees.**

1 Cloud Roles – Salary, Experience, Work & Life Overview (India)

No.	Role	Salary Range (₹ LPA – India)	Experience Required	Day-to-Day Responsibilities	Work-Life Balance	Job Timing / Shift	On-Site Opportunities
1	Cloud Support Engineer	3 – 7 LPA	0–2 yrs	Ticket handling, troubleshooting, support escalation	★ ★ (Shift load)	Night/Rotational	Low
2	Cloud Engineer	5 – 12 LPA	0–3 yrs	Provision VMs, storage, networking, deploy apps, monitor resources	★ ★ ★ ★ (Good)	Mostly day shift	Medium
3	Cloud Analyst	5 – 10 LPA	1–4 yrs	Cost analysis, usage reports, optimization recommendations	★ ★ ★ ★	Day shift	Low
4	Cloud Operations Engineer	6 – 14 LPA	2–6 yrs	Monitoring, incident handling, backups, patching, uptime	★ ★ ★ (Rotational stress)	24x7 / shifts	Medium
5	Cloud Administrator	5 – 11 LPA	2–6 yrs	User access, monitoring	★ ★ ★ ★	Day shift	Medium

				, patching, compliance			
6	Cloud Specialist	8 – 18 LPA	4–10 yrs	Deep expertise in security/networking/data/Dev Ops	★ ★ ★	Depends	Medium–High
7	Cloud Consultant	10 – 25 LPA	5–10 yrs	Requirement analysis, migration planning, cost & security advice	★ ★ ★	Day shift	High
8	Cloud Architect	15 – 35+ LPA	8–15 yrs	Design cloud architecture, cost optimization, security, migration strategy	★ ★ ★ Moderate	Day shift	High
9	Cloud Architecture Consultant	18 – 40 LPA	10–18 yrs	Client consulting, cloud transformation, governance, solution design	★ ★ ★ (Client pressure)	Day shift	Very High

2 Which Course Adds More Value for Quick Job?

No.	Learning Mode	Value for Job	Why
1	Online Certification + Hands-On Labs	★ ★ ★ ★ ★ (Best)	Recruiters trust AWS/Azure/GCP certifications
2	Hybrid (Online + Local Practice)	★ ★ ★ ★ ★	Fastest & safest path

3	Offline Local Coaching	★ ★ ★	Helpful only if placement tie-ups exist
4	Only Offline Coaching	★ ★	Often outdated syllabus
5	Only Theory / YouTube	★	No hiring value

✓Fastest hiring roles:

Cloud Support Engineer → Cloud Engineer → Cloud Operations Engineer

3 Online Certifications (Most Valued by Recruiters)

Certification	Role Fit	Fees (₹ Approx)	Already Part of edureka
Azure AZ-900	Entry-level	4,800	YES
AWS Cloud Practitioner	Entry-level	8,000	YES
Google Associate Cloud Engineer	Engineer	10,000	
Azure AZ-104	Engineer/Admin	13,000	YES
AWS Solutions Architect – Associate	Engineer/Admin	15,000	YES
AWS SysOps Administrator	Ops/Admin	15,000	
Azure AZ-305	Architect	16,500	YES
Google Professional Architect	Architect	20,000	
AWS DevOps Engineer – Pro	Specialist	30,000	YES
Kubernetes CKA	Ops/DevOps	30,000	

4 Offline Certifications (India)

Institute	Course	Fees (₹)	Placement Value
CDAC	Cloud & DevOps PG Diploma	90k – 1.5L	★ ★ ★ ★
NIIT	Cloud Engineering	70k – 1.2L	★ ★ ★

Jetking	Cloud + Infra	60k – 1L	★ ★ ★
Local Institutes	Cloud Admin	30k – 60k	★ ★

❑ **Offline works only if placement support is REAL**

5 Online Courses (Hands-On Focus)

Platform	Course	Fees (₹)	Best For
Udemy	AWS / Azure Full Course	500 – 1,500	Beginners
Coursera	Google Cloud Professional	3k/month	Analysts
A Cloud Guru	Cloud Labs	4k/month	Engineers
Pluralsight	Cloud + DevOps	3k/month	Ops
Linux Foundation	Kubernetes	15k – 25k	Specialists

6 Qualifications Required (Reality)

Requirement	Mandatory?
Engineering Degree	✗ Not mandatory
Basic Linux	✓ Mandatory
Networking Basics	✓ Mandatory
Scripting (Python/Bash)	✓ Preferred
Certification	✓ Strong advantage
Hands-on Projects	✓ MUST

7 On-Site Opportunity Frequency

Role	On-Site Chances
Cloud Architect	Very High
Cloud Consultant	High
Cloud Engineer	Medium
Cloud Ops Engineer	Medium
Cloud Support Engineer	Low
Cloud Analyst	Low

8 Best Role Based on Life Situation

Priority	Best Role
Quick Job	Cloud Support Engineer
Stable Day Job	Cloud Administrator
High Salary	Cloud Architect
On-Site Travel	Cloud Consultant
Low Stress	Cloud Analyst
Long-term Growth	Cloud Engineer → Architect

9 Final Practical Advice (Very Important)

- ✓Do NOT chase “Architect” directly
- ✓Start with **Support / Engineer**
- ✓Add **1 Cloud certification + 2 hands-on projects**
- ✓Apply within **30–45 days**

If you want, I can:

- Create a **90-day cloud job roadmap**
- Recommend **best certification for YOUR background**

- Suggest **fake-proof resume projects**
- Tell **which role suits you after career gap**

Based on **your background** (long career gap, practical mindset, preference for structured learning, and goal to get a **cloud job quickly** rather than just certificates), here is a **clear, no-confusion recommendation**.

✓ **Best Cloud Certifications for YOUR Background (Gap Candidate – India)**

☐ **Your Reality (Important Context)**

- Career gap (not a fresher, not recent graduate)
 - Need **job-oriented + recruiter-trusted** certification
 - Need **hands-on confidence** for interviews
 - Need roles like **Cloud Engineer / Cloud Admin / Cloud Ops**
 - Avoid over-complex “Architect-first” mistakes
-

☐ **TOP 3 CERTIFICATIONS (PRIORITY ORDER)**

☑ **AWS Certified Solutions Architect – Associate (SAA-C03)**

☐ **BEST & MUST-HAVE FOR YOU**

Factor	Why it fits YOU
Hiring Demand	★ ★ ★ ★ ★ (Highest in India)
Gap Friendly	✓ Yes
Interview Value	✓ Strong
Roles Opened	Cloud Engineer, Cloud Admin, Cloud Ops
Theory + Practical	Perfect balance
Fake Experience Needed?	✗ No

Exam Fee: ~₹15,000

Preparation Time: 2–3 months

Outcome: Recruiters take you seriously despite gap

- ☐ **This single certification can restart your IT career**

📌 Microsoft Azure Administrator (AZ-104)

- ☐ **SECOND BEST (Optional but powerful)**

Why useful
Many Indian companies use Azure
Admin + Ops focused
Easier for interviews than Architect
Strong for day-shift corporate roles

Exam Fee: ~₹13,000

Prep Time: 1.5–2 months

- ☐ Do this **only after AWS SAA** or if company demand requires Azure.

📌 Linux Fundamentals + Kubernetes Basics (CKA later)

Skill	Reason
Linux	Non-negotiable for cloud jobs
Kubernetes (basic)	Interview brownie points
CKA (later)	After job, not now

- ☐ **Linux is more important than any cloud cert**

✗ CERTIFICATIONS YOU SHOULD AVOID (FOR NOW)

Certification	Why NOT
AWS Cloud Practitioner only	Too basic, no job impact
AWS Architect Professional	Too advanced for gap

Terraform Pro	Not needed initially
Multiple cloud certs together	Confusion + no mastery
Offline-only institute certificates	Low recruiter trust

❑ **BEST CERTIFICATION PATH (SAFE & FAST)**

📅 **Phase 1 (0-3 Months)**

✓Linux Basics

✓AWS Solutions Architect – Associate

✓2-3 Hands-on Projects

📅 **Phase 2 (After Job or Interviews Start)**

✓Azure AZ-104 (optional)

✓Kubernetes basics

❑ **Hands-On Projects You MUST Do (Along with Certification)**

(These matter more than the certificate)

1. Deploy 2-tier app on AWS (EC2 + ALB + RDS)
2. IAM users, roles, policies (interview favorite)
3. VPC with public/private subnets
4. Monitoring using CloudWatch
5. Cost optimization setup (budget + alerts)

❑ **Interview Truth (Very Important)**

Recruiters **do not reject you for gap**

They reject you if:

- ✗ You cannot explain IAM
- ✗ You cannot draw VPC
- ✗ You memorized but didn't practice

✓ **FINAL STRAIGHT ANSWER (No Sugarcoating)**

☐ **If you do ONLY ONE certification:**
AWS Solutions Architect – Associate

☐ **If you do TWO certifications:**
AWS SAA + Azure AZ-104

☐ **If you want a job, not certificates:**
AWS SAA + Linux + Projects

If you want, next I can:

- Create **your exact certification study plan (daily schedule)**
- Map **certification → resume → job titles**
- Tell you **how to explain gap in interviews confidently**
- Suggest **best role to target first based on your age & health**
