The project name is self-explanatory. Explain what all technologies are required.

Here is a categorized explanation of the **technologies required** for each project based on the **self-explanatory project names**. I've grouped them for clarity:

AWS Lambda Projects

These projects demonstrate different runtimes and frameworks for deploying functions using AWS Lambda.

Technologies:

- **AWS Lambda**
- **Custom Runtimes** (Rust, Bash, etc.)
- **Python, Java, Spring Boot**
- **Amazon API Gateway** (for REST APIs)
- **SAM/CloudFormation/Terraform** (optional, for deployments)

Project Name	Technologies Required
aws-lambda-application-with-a-custom-runtime-rust	Rust, AWS Lambda (custom runtime)
aws-lambda-application-with-a-custom-runtime-bash	Bash, AWS Lambda (custom runtime)
python-lambda-rest-api-without-runner	Python, AWS Lambda, API Gateway

python-lambda-rest-api-with-runner	Python, AWS Lambda, API Gateway, Lambda function runner
springboot-lambda-rest-api-with-runner	Spring Boot, Java, AWS Lambda, AWS Lambda Runtime Interface
springboot-lambda-rest-api-without-runner	Spring Boot, Java, AWS Lambda, API Gateway
lambda-aws-java-example-without-runner	Java, AWS Lambda, API Gateway
lambda-aws-java-example-with-runner	Java, AWS Lambda with runtime wrapper

Apps with AWS RDS

Full applications connecting to relational databases on AWS.

Technologies:

- **Spring Boot / Flask**
- **AWS RDS** (MySQL/PostgreSQL)
- **IAM Roles, VPC, Security Groups**
- **EC2** (optional)
- **JDBC/SQLAlchemy**

Project Name	Technologies Required
python-flask-aws-rds-app	Python, Flask, AWS RDS, SQLAlchemy
springboot-aws-rds-app	Spring Boot, AWS RDS, JDBC

Static Web Apps (HTML/CSS Gym App)

These projects deploy a simple static HTML/CSS website.

Technologies:

- **HTML/CSS**
- **Ubuntu VM** (Cloud or Local)
- **GitHub/GitLab/Jenkins**
- **AWS/GCP/Azure** or **Local Windows/VMs**
- **Web Servers** (Nginx/Apache optional)

Project Name	Technologies Required
static-gym-html-css-app-aws-ubuntu	HTML/CSS, AWS EC2 (Ubuntu), Apache/Nginx
static-gym-html-css-app-gitlab-local-vm-ubuntu	HTML/CSS, GitLab CI/CD, Ubuntu VM
static-gym-html-css-app-github-local-vm-ubuntu	HTML/CSS, GitHub Actions, Ubuntu VM
static-gym-html-css-app-gitlab-local-windows	HTML/CSS, GitLab, Windows
static-gym-html-css-app-github-local-windows	HTML/CSS, GitHub, Windows
static-gym-html-css-app-jenkins-local-windows	HTML/CSS, Jenkins, Windows
static-gym-html-css-app-jenkins-local-vm-ubuntu	HTML/CSS, Jenkins, Ubuntu
static-gym-html-css-app-gcp-ubuntu	HTML/CSS, Google Cloud VM, Nginx/Apache
static-gym-html-css-app-azure-ubuntu	HTML/CSS, Azure VM, Apache/Nginx
static-gym-html-css-app	HTML/CSS

Spring Boot Gym App (Fullstack)

Spring Boot backend integrated with static or dynamic frontends, hosted across cloud platforms.

Technologies:

- Spring Boot
- HTML/CSS
- GitHub/GitLab/Jenkins
- AWS/GCP/Azure
- CI/CD pipelines
- Java, Maven

Project Name	Technologies Required
springboot-gym-html-app-gcp-ubuntu	Spring Boot, HTML/CSS, GCP, Compute Engine
springboot-gym-html-app-azure-ubuntu	Spring Boot, HTML/CSS, Azure VM

springboot-gym-html-app-aws-ubuntu	Spring Boot, HTML/CSS, AWS EC2
springboot-gym-html-app-gitlab-windows	Spring Boot, GitLab, Windows
springboot-gym-html-app-jenkins-ubuntu	Spring Boot, Jenkins, Ubuntu
springboot-gym-html-app-jenkins-windows	Spring Boot, Jenkins, Windows
springboot-gym-html-app-github-ubuntu	Spring Boot, GitHub Actions, Ubuntu
springboot-gym-html-app-gitlab-ubuntu	Spring Boot, GitLab CI/CD, Ubuntu
springboot-gym-html-app-github-windows	Spring Boot, GitHub, Windows

Java & Core Java Learning Projects

Project Name	Technologies Required
core-java-programming-examples	Java SE, OOP, Collections, etc.
java_8_features_with_real_time_examples	Java 8, Streams, Lambda, Optional, etc.
core-java-hello-world	Java
spring-boot-hello-world	Spring Boot, Maven
SpringBootHelloWorldExampleApplication	Spring Boot
springboot-html-app	Spring Boot, HTML/CSS

Web Stacks & Framework Projects

Project Name	Technologies Required
lamp_linux_apache_mysql_php	Linux, Apache, MySQL, PHP
wamp_windows_apache_mysql_php	Windows, Apache, MySQL, PHP
mern_mongodb_express_react_nodejs	MongoDB, Express.js, React, Node.js
vue_node_mysql_app	Vue.js, Node.js, MySQL
laravel_vue_mysql_app	Laravel (PHP), Vue.js, MySQL

golang-react-mysql-app	Go, React.js, MySQL
angular_django_mysql_app	Angular, Django (Python), MySQL
react-java-springboot-mysql-fullstack	React, Spring Boot, MySQL
my-angular-app	Angular
my-react-app	React.js

Microservices and Monolith Projects

Project Name	Technologies Required
all-microservices-modules-project	Spring Boot, REST APIs, Eureka, Zuul, Config Server
all-monolithic-microservices-modules-project	Monolith + Microservice patterns, Spring Boot
Spring-Microservice-main	Spring Boot Microservices
spring-boot-monolith	Spring Boot (Monolith Architecture)
microservice-parent-project	Parent POM for microservices

Kafka Project

Project Name	Technologies Required
kafka-demo	Apache Kafka, Java/Spring

Salesforce Project

Project Name	Technologies Required
my-sfdx-project	Salesforce DX, CLI, Metadata, Apex

Directory Utility Script

Project Name	Technologies Required
List_All_Files_In_A_Directory_And_Nested_Sub_Directories	Bash / Python Scripting

Eclipse AWS Toolkit Plugin

Project Name	Technologies Required
AWS-Toolkit-for-Eclipse_-v201805311643-Release	AWS Toolkit Plugin for Eclipse
