AWS, Azure, or GCP—which are the most commonly used services that we use day to day, and which should I study and get hands-on experience with because nowadays people are asking me questions about the cloud in the interview? first Mark those services with a green color and **less-used services orange color**.

No.	Category	AWS	Azure	GCP
1	**Compute (VMs)**	EC2 (Elastic Compute Cloud)	Azure Virtual Machines	Google Compute Engine
2	**Object Storage**	Amazon S3	Azure Blob Storage	Google Cloud Storage
3	**Relational Databases**	Amazon RDS	Azure SQL Database	Google Cloud SQL
4	**NoSQL Databases**	Amazon DynamoDB	Azure Cosmos DB	Google Cloud Bigtable
5	**Networking - VPC**	Amazon VPC	Azure Virtual Network	Google VPC
6	**Networking - Direct**	AWS Direct Connect	Azure ExpressRoute	Cloud Interconnect
7	**Serverless Compute**	AWS Lambda	Azure Functions	Google Cloud Functions
8	**API Management**	Amazon API Gateway	Azure Logic Apps / API Management	Cloud Run
9	**Container Services**	Amazon ECS / Amazon EKS	Azure Kubernetes Service (AKS)	Google Kubernetes Engine (GKE)
10	**Identity & Access**	AWS IAM	Azure Active Directory (Azure AD)	Google Cloud IAM
11	**Monitoring & Logging**	Amazon CloudWatch / AWS CloudTrail	Azure Monitor / Azure Log Analytics	Google Cloud Monitoring / Stackdriver Logging
12	**AI/ML Services**	Amazon SageMaker / Comprehend	Azure Machine Learning / Cognitive Services	Google AI Platform / TensorFlow
13	**DevOps & CI/CD**	AWS CodeDeploy / CodePipeline	Azure DevOps / Azure Pipelines	Google Cloud Build / Cloud Source Repositories
