Here's a comprehensive list of **government cloud service providers (GovClouds)** and the **most popular ones used in IT companies in India**:

Government Cloud (GovCloud) Service Providers in India

Cloud Provider	Managed/Owned by	Purpose/Target Users
MeghRaj Cloud (GI Cloud)	**Ministry of Electronics and IT (MeitY)**	Centralized cloud for Indian government use
NIC Cloud (National Informatics Centre Cloud)	**NIC, under MeitY**	Govt departments, ministries, e-governance
STQC-empanelled Cloud Providers	Certified by **Standardization Testing and Quality Certification**	For secure government workloads
CDAC Cloud	Centre for Development of Advanced Computing	Scientific, research, and e-governance apps
Sovereign Cloud by RailTel	RailTel (under Ministry of Railways)	Government and PSU data hosting
PowerGrid Cloud	POWERGRID (Govt. of India PSU)	Smart grid, SCADA, and infrastructure

---

STQC-Approved Private/Public Cloud Providers for Government Use

These **commercial cloud providers** have been **STQC (Standardization Testing and Quality Certification)** certified and empaneled by **MeitY**, allowing them to host **government workloads**:

Cloud Provider	Status	Popular In
Amazon Web Services (AWS India)	STQC-empaneled (GovCloud Region in India)	Central & State Govt projects, Smart Cities
Microsoft Azure (India)	STQC-empaneled (local Azure regions)	Education, healthcare, digital governance
Google Cloud (GCP India)	STQC-empaneled	AI/ML use cases, e-governance
Oracle Cloud (India)	STQC-empaneled	BFSI, UIDAI-like services

Tata Communications Cloud (IZO)	Indian telecom cloud provider	Public sector enterprises, PSUs
NxtGen Cloud	Indian cloud platform	Many state government portals
CtrlS Cloud	STQC-compliant data centers	High-security workloads like defense, police apps

---

Most Popular GovCloud or Cloud Providers in Indian IT Companies (for Govt Projects)

Rank	Provider	Used By IT Companies For
1	**NIC MeghRaj Cloud**	Hosting e-governance portals, UIDAI, DigiLocker, etc.
2	**AWS India GovCloud**	Smart city apps, public portals, AI/ML, disaster management
3	**Microsoft Azure India**	Education, state govt data centers, health sector
4	**Google Cloud (India)**	Data analytics, digital governance, AI/ML for government
5	**CtrlS/NxtGen/Oracle**	PSU, Railways, energy, defense, and law enforcement sectors

---

Key Requirements for GovCloud Providers (MeitY Guidelines):

- Data localization (must store data in India)
- STQC certification (for hosting government apps)
- ISO/IEC 27001, 27017, 27018 compliance
- Disaster recovery within India
- Empanelment with **MeitY**

IT Companies in India Using These for Govt Projects:

- **TCS, Infosys, Wipro, Tech Mahindra, HCL** – Often use **NIC Cloud, AWS, and Azure GovCloud**
- **Startups & MSMEs** – Prefer **MeghRaj, NxtGen, CtrlS** for smaller-scale govt projects
- **Capgemini, L&T Infotech** – Use **STQC-approved** cloud services for public-sector tenders

---

Would you like a **comparison table between MeghRaj and AWS/Azure GovCloud** or a **sample project architecture for a government e-service** on these clouds?
