Here's a list of **government container service providers** in India, along with an overview of which are **most popular among IT companies** working with or for the Indian government:

---

**List of Government Container Service Providers in India**

| Government Entity / Initiative | Container Service/Platform | Description |
|---|---|---|
| **NIC (National Informatics Centre)** | **MeghRaj Cloud (GI Cloud)** | Offers containerized services via Kubernetes & Docker on the government cloud (MeghRaj). |
| **C-DAC (Centre for Development of Advanced Computing)** | **PARAM Shavak, CDAC Cloud Container Platform** | Supports container deployments for scientific and AI/ML workloads. |
| **Government e-Marketplace (GeM)** | **NIC Cloud-based CI/CD with containers** | Runs microservices in containerized environments. |
| **Indian Railways (CRIS)** | **RailCloud** | Uses Docker/Kubernetes to host apps in their private cloud. |
| **ISRO / IN-SPACe Cloud** | Kubernetes-based containerization for satellite data applications. | |
| **SEMT/NICSI** | MeghRaj-compatible container deployment on virtualized infrastructure (OpenStack + Docker). | |
| **BharatNet / BBNL Infrastructure** | Containers used in telecom and edge deployments. | |

---

**Most Popular Government Container Platforms in IT Companies (India)**

| Rank | Container Provider | Why It's Popular |
|---|---|---|
| 1 | **NIC MeghRaj Cloud (GI Cloud)** | Default cloud for central & state government projects, supporting container workloads via Kubernetes/Docker. |
| 2 | **CDAC Cloud / National Supercomputing Mission** | Used in AI, ML, data analytics, and defense-related containerized apps. |
| 3 | **RailCloud (CRIS)** | Popular among vendors working with Indian Railways for logistics and digital ticketing. |
| 4 | **GeM Infrastructure (NIC)** | Growing use of containers for e-commerce and procurement apps. |
| 5 | **ISRO/IN-SPACe** | For research and satellite data analytics workloads using containers. |

---

**Popular with IT Companies:**

IT service providers working with government projects in India (like **TCS**, **Infosys**, **Wipro**, **HCL**, **Tech Mahindra**, and **NICSI empaneled vendors**) prefer:

1. **NIC MeghRaj + Docker/Kubernetes** — for eGovernance, Smart Cities, Healthcare, Education.
2. **CDAC Kubernetes clusters** — for defense and scientific computing projects.
3. **RailCloud (CRIS)** — for smart transportation & logistics applications.

---

**Technologies Commonly Used**

- **Container Runtimes:** Docker, containerd
- **Orchestration:** Kubernetes (k8s), K3s (for lightweight edge apps)
- **CI/CD:** Jenkins, GitLab CI, NIC DevOps stack
- **Monitoring:** Prometheus, Grafana, ELK on containers

---

Would you like an architecture diagram for a sample government container deployment (like e-Governance or Smart City)?
