Here's a **complete list of popular container service providers** globally and in **India**, along with information about which ones are **most commonly used in Indian IT companies**:

List of Container Service Providers (Global & Indian Market)

#	Container Service Provider	Type	Used in India?	Popularity in Indian IT Companies
1	**Amazon EKS (Elastic Kubernetes Service)**	Managed by AWS	✅ Yes	⭐⭐⭐⭐⭐
2	**Kubernetes (K8s)**	Orchestration	✅ Yes	⭐⭐⭐⭐⭐ (Very High)
3	**Docker**	Open-source/Engine	✅ Yes	⭐⭐⭐⭐⭐ (Very High)
4	**Red Hat OpenShift**	Enterprise K8s Platform	✅ Yes	⭐⭐⭐⭐
5	**Google Kubernetes Engine (GKE)**	Managed by Google	✅ Yes	⭐⭐⭐⭐
6	**Azure Kubernetes Service (AKS)**	Managed by Microsoft	✅ Yes	⭐⭐⭐⭐
7	**Amazon ECS (Elastic Container Service)**	Managed by AWS	✅ Yes	⭐⭐⭐⭐
8	**Rancher**	Multi-cluster Manager	✅ Yes	⭐⭐⭐
9	**Heroku Container Runtime**	Managed PaaS	✅ Yes (Startups)	⭐⭐
10	**DigitalOcean Kubernetes**	Managed by DigitalOcean	✅ Yes (Startups)	⭐⭐
11	**IBM Cloud Kubernetes Service**	Managed by IBM	✅ Yes (Few MNCs)	⭐⭐
12	**CRI-O**	Kubernetes container runtime	✅ Yes	⭐⭐ (Growing in Cloud-native)
13	**Podman**	Open-source (Docker alt)	✅ Yes	⭐⭐ (Growing)

14	**Linode Kubernetes Engine (LKE)**	Managed by Linode	✅ Yes (Rare)	☆
15	**Alibaba Cloud Container Service for Kubernetes**	Managed by Alibaba	✅ Yes (Rare)	☆

Most Popular Container Services in Indian IT Companies (by Adoption)

Rank	Provider	Reason for Popularity
1	**Docker**	Industry standard for containerization, local development, and deployment.
2	**Kubernetes (K8s)**	Most widely adopted for orchestration in production.
3	**Amazon EKS / ECS**	AWS dominance in Indian IT infra, easy integration with other AWS services.
4	**Azure AKS**	Preferred by companies using Microsoft ecosystem (banks, enterprises, govt orgs).
5	**GCP GKE**	Popular in startups and data/AI-driven companies.
6	**Red Hat OpenShift**	Used in enterprise-grade hybrid cloud environments.
7	**Rancher**	Gaining traction in multi-cluster Kubernetes management.

Notes:

- **Docker + Kubernetes** combo is the most common setup across all Indian companies.
- **AWS (EKS/ECS)** is the preferred cloud container service due to AWS's widespread usage.
- **AKS** and **OpenShift** are preferred by BFSI, government, and Microsoft-aligned companies.
- **Podman** and **CRI-O** are being explored in some Linux-native or secure environments.

If you'd like, I can also help you:

- Choose the right container platform for your project
- Set up Docker + Kubernetes locally or on the cloud
- Build a real-world CI/CD pipeline using containers

Would you like that?

Here is a **comprehensive list of container service providers**, followed by a list of the **most popular ones used in IT companies in India**:

List of All Major Container Service Providers

Provider Name	Container Service	Description
Docker Inc.	Docker Engine, Docker Hub	Popular container runtime and image registry
Kubernetes (CNCF)	Kubernetes (K8s)	Open-source container orchestration system
Amazon Web Services (AWS)	Amazon ECS, Amazon EKS, Fargate	ECS: proprietary orchestration, EKS: managed Kubernetes, Fargate: serverless
Microsoft Azure	Azure Kubernetes Service (AKS), Container Apps	AKS: managed Kubernetes, Container Apps: serverless containers
Google Cloud Platform (GCP)	Google Kubernetes Engine (GKE), Cloud Run	GKE: managed Kubernetes, Cloud Run: fully managed serverless containers
Red Hat (IBM)	OpenShift Container Platform	Enterprise Kubernetes platform with CI/CD and DevSecOps
VMware	Tanzu	Kubernetes-based container management for vSphere and cloud
Oracle Cloud Infrastructure	Oracle Container Engine for Kubernetes (OKE)	Managed Kubernetes service
IBM Cloud	IBM Cloud Kubernetes Service	Managed Kubernetes and container orchestration
Alibaba Cloud	Container Service for Kubernetes (ACK)	Managed Kubernetes platform in Alibaba Cloud
DigitalOcean	App Platform, Kubernetes	Simple container deployment and K8s for startups/SMBs
Linode (Akamai)	Kubernetes Engine (beta), Docker hosting	Affordable K8s for developers and startups

Heroku	Heroku Container Registry	PaaS container support for apps
Rancher (by SUSE)	Rancher	Multi-cluster Kubernetes management
Platform.sh	Container-based PaaS	Git-driven deployments for web apps

---

Most Popular Container Service Providers in IT Companies in India (2025)

Rank	Provider	Used For	Reason for Popularity
1	**Docker**	Local development, CI/CD pipelines	Lightweight, developer-friendly, open-source
2	**Kubernetes**	Orchestration across cloud and on-prem	Industry standard, scalable, open-source
3	**AWS (EKS, ECS)**	Production-grade container deployments	Widely adopted, seamless with other AWS services
4	**Azure (AKS)**	Enterprise container workloads	Integration with Microsoft ecosystem, especially in BFSI, Govt
5	**GCP (GKE, Cloud Run)**	Cloud-native workloads, ML/AI apps	Scalable, DevOps and AI/ML friendly
6	**Red Hat OpenShift**	Enterprises, banking & telecom	Enterprise-grade security, compliance, hybrid cloud support
7	**DigitalOcean K8s**	Startups and small IT companies	Cost-effective and easy to use

---

Notes:

- **Docker + Kubernetes** is the **most common combination** used for local dev and production orchestration.
- **Cloud-native Kubernetes services (EKS, AKS, GKE)** are preferred in **mid to large IT enterprises**.
- **OpenShift** is often chosen by **regulated industries** like **BFSI, government, and telecom**.
- **Serverless containers** (AWS Fargate, Azure Container Apps, GCP Cloud Run) are rising in popularity for **event-driven and microservices applications**.
